# National Interagency Coordination Center <br> Incident Management Situation Report <br> Friday, July 24, 2020 - 0730 MDT <br> National Preparedness Level 3 

National Fire Activity:
Initial attack activity:

## Moderate (220 new fires)

New large incidents:
9
Large fires contained:
7
Uncontained large fires:*** 34
Area Command teams committed: 0
NIMOs committed: 1
Type 1 IMTs committed: 3
Type 2 IMTs committed: 7
Nationally, there are 14 large fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington, D.C.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Reno, NV, in support of wildland fire operations in the West.

Two MAFFS C-130 airtankers and support personnel from the $146^{\text {th }}$ Airlift Wing (California Air National Guard) have been deployed to McClellan Airfield, CA, in support of wildland fire operations.

*1 Hectare $=2.47$ Acres

Predictive Services Discussion: A low pressure area moving east through southwestern Canada will ingest the remaining moisture from the remnants of the low pressure area over Montana. This will result in a reduction in the amount of storm activity over the Great Basin and Northern Rockies. However, isolated storms are still expected to develop during the afternoon period, especially across southern Idaho and northeastern Nevada. Isolated storms will be possible in the central Sierra along the tail end of a weak frontal boundary. The strong surge of monsoonal moisture will continue across the Four Corner states. Hot and humid conditions will continue in the East as the strong, large high pressure ridge remains anchored over the eastern Great Plains. Scattered storms will be possible along the Gulf Coast and across the Carolinas. In Alaska, cool and showery conditions will continue as low pressure areas remain entrenched over the Interior.

SAFENET<br>Fire Communication Category

The SAFENET system is a way for firefighters and support staff to report unsafe or unhealthy situations and near-misses. SAFENET is an easy, quick way to report a safety concern. It's also a way for front line firefighters to be involved in the daily job of being safe and keeping others safe, by documenting and helping to resolve safety issues.

It is also a way for fire managers to hear about and correct hazardous conditions, collect and track important safety data, and identify trends that could be developing.

Here are some facts about SAFENET and how it works:

- Individuals who observe or are involved in an unsafe situation should initiate immediate corrective action, if possible. The occurrence should then be reported via SAFENET.
- Reports should identify unsafe situations in wildland fire, all-hazard operations, training, and other related work environments.
- SAFENET is a confidential database. Users are encouraged but not required to put their name and contact information on the report.
- SAFENETs are sanitized to display safety and health-related information only, and will not identify the names of individuals, crews, or other resources.
- If the reporting party did not observe the situation first-hand, the SAFENET will likely not be published. Instead of filing a report, encourage those who were directly involved to do so.
- SAFENETs that do not include the name of the incident and/or location of the event will not be posted.
- SAFENETs that contain unprofessional content (e.g., personal attacks/slander, character defamation) will not be posted, or the offensive comments will be removed prior to posting.
- There is no punishment or penalty for filing a SAFENET, nor is it mandatory.

## Submit a SAFENET

Submit directly to the SAFENET system: https://safenet.nifc.gov/safenet.cfm
