## Northern California Area (PL 3)

New fires: 19
New large incidents: 0
Uncontained large fires: 7
Type 1 IMTs committed: 2
Type 2 IMTs committed: 2
July Complex, Modoc NF, USFS. IMT 1 (CA Team 1) and IMT 2 (CA Team 12). Thirty-six miles northwest of Canby, CA. Timber, brush and tall grass. Moderate fire behavior with flanking, backing and creeping. Energy and railroad infrastructure, structures and sage-grouse habitat threatened. Area, road and trail closures in effect.

Gold, Lassen-Modoc Unit, Cal Fire. IMT 1 (Cal Fire Team 4). Five miles south of Adin, CA. Timber. Minimal fire behavior with smoldering, creeping and single tree torching. Evacuations have been lifted.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. IMT2 (CA Team 14). Fourteen miles northeast of Willow Creek, CA. Timber, chaparral and short grass. Active fire behavior with uphill runs, group torching and flanking. Area closures in effect.

Hog, Lassen-Modoc Unit, Cal Fire. Ten miles west of Susanville, CA. Timber and brush. Minimal fire behavior with smoldering. Area and trail closures in effect.

S-4, Northern California District, BLM. Forty miles northeast of Cedarville, CA. Timber, brush and tall grass. Minimal fire behavior with isolated torching and smoldering. Structures and sage-grouse habitat threatened. Reduction in acreage due to more accurate mapping.

MP 21, Hoopa Valley Tribe, BIA. Three miles south of Weitchpec, CA. Timber. Minimal fire behavior with smoldering.

*1 Hectare $=2.47$ Acres

Predictive Services Discussion: The Four Corners High will drift east and weaken slightly as a trough of low pressure moves southeast out of the Gulf of Alaska toward the coast of Washington. Widely scattered wet storms will linger along the length of the Continental Divide from Alberta south into Mexico. West of the divide, however, dry conditions will continue. Hurricane Isaias will bring tropical storm conditions to portions of South Florida, especially along and near the Atlantic Coast. Another trough of low pressure will move across the Great Plains, bringing cooler temperatures and scattered convection to the Upper Midwest. A disturbance out ahead of the trough will move northeast across the Ohio River Valley, bringing scattered strong storms to Kentucky, Ohio, and the Virginias. In Alaska, the high pressure ridge from the Lower 48 will extend north across Canada and through the Alaskan Interior and into the Bering Sea. This will create warm and dry conditions with scattered convection across the eastern Interior.

## Spot Weather Forecast

Weather - Fire Behavior Category

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.

Basic elements needed for a spot weather forecast include:

- Name of fire and management agency.
- Request time and date.
- Location by $1 / 4$ section.
- Drainage name.
- Exposure.
- Size.
- Elevation (top and bottom).
- Fuel type.
- Fire character (ground, crown, etc.).
- Weather conditions (place, elevation, observation time, wind direction, wind velocity, dry bulb, wet bulb, remarks, and important U.S. indicators).

Activity: Calibrate your Kestrel and review belt weather kit use.

Discuss Spot Weather Forecast under Other References (white) in the Incident Response Pocket Guide PMS 461.

[^0]:    * Apple, Riverside Unit, Cal Fire. One mile northeast of Cherry Valley, CA. Timber, chaparral and tall grass. Extreme fire behavior with running. Several communities and numerous residences threatened. Evacuations, area and road closures in effect.
