

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, August 19, 2020 – 0730 MDT
National Preparedness Level 5**

National Fire Activity:

Initial attack activity:	Heavy (332 new fires)
New large incidents:	34
Large fires contained:	9
Uncontained large fires:***	75
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	10
Type 2 IMTs committed:	8

Nationally, there are 18 large fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Northern California Area (PL 4)

New fires: 224
 New large incidents: 19
 Uncontained large fires: 30
 Type 1 IMTs committed: 5
 Type 2 IMTs committed: 1

* **SCU Lightning Complex** (4 fires), Santa Clara Unit, Cal Fire. IMT 1 (Cal Fire Team 6). Five miles southwest of Brentwood, CA. Includes previously reported Deer, Arroyo, Canyon and 4-1 Marsh fires. Tall grass and chapparal. Extreme fire behavior with uphill runs and group torching. Numerous residences and energy infrastructure threatened. Area, road and trail closures in effect.

* **Jones**, Nevada-Yuba-Placer Unit, Cal Fire. Three miles southeast of Birchville, CA. Timber, dormant brush and hardwood slash. Active fire behavior with uphill runs and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

LNU Lightning Complex (7 fires), Sonoma-Lake Napa Unit, Cal Fire. IMT 1 (Cal Fire Team 2) mobilizing. Two miles north of Barro, CA. Chapparal, tall grass and timber. Extreme fire behavior with long-range spotting, short-range spotting and single tree torching. Numerous structures, energy and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

Loyalton, Tahoe NF, USFS. IMT 2 (CA Team 10). Four miles northeast of Loyalton, CA. Timber and tall grass. Extreme fire behavior with wind-driven runs, backing and isolated torching. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

CZU Aug Lightning (4 fires), San Mateo-Santa Cruz Unit, Cal Fire. Eight miles east of Pescadero, CA. Timber, brush, and closed timber litter. Active fire behavior with uphill runs, torching and long-range spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

* **BTU Light Complex 2020**, Butte Unit, Cal Fire. IMT 1 (Cal Fire Team 4) mobilizing. One mile northwest of Oroville, CA. Timber and heavy slash. Active fire behavior with wind-driven runs, uphill runs and backing. Numerous residences threatened.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. IMT 1 (CA Team 4). Fourteen miles northeast of Willow Creek, CA. Timber, chaparral and short grass. Active fire behavior with uphill runs, flanking and torching. Area, road and trail closures in effect.

August Complex (3 fires), Mendocino NF, USFS. Fourteen miles northwest of Elk Creek, CA. IMT 2 (CA Team 15) mobilizing. Timber, brush and medium slash. Extreme fire behavior with torching, spotting and crowning.

* **North Complex** (2 fires), Plumas NF, USFS. IMT 1 (CA Team 1) mobilizing. One mile southwest of Crescent Mills, CA. Timber, short grass and brush. Extreme fire behavior with crowning, uphill runs and torching. Numerous structures threatened. Evacuations, area and road closures in effect.

* **W-5**, Northern California District, BLM. Eleven miles east of Madeline, CA. Brush, light slash and timber. Extreme fire behavior with wind-driven runs and short-range spotting. Structures and sage-grouse habitat threatened. Road closures in effect.

5-4 Potters, Butte Unit, Cal Fire. Five miles northeast of Oroville, CA. Brush and grass. Active fire behavior with wind-driven runs and running. Numerous structures and energy infrastructure threatened. Evacuations, area, road, and trail closures in effect.

* **Woodward**, Point Reyes National Seashore, NPS. Three miles southwest of Olema, CA. Timber, brush and chaparral. Active fire behavior with uphill runs and wind-driven runs. Communication infrastructure threatened. Evacuations in effect.

* **R-5**, Northern California District, BLM. Seventeen miles northeast of Susanville, CA. Brush and short grass. Minimal fire behavior with creeping. Sage-grouse habitat threatened.

July Complex, Modoc NF, USFS. Thirty-six miles northwest of Canby, CA. Timber, brush and tall grass. Minimal fire behavior with smoldering. Area and road closures in effect.

New fires:	10
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

Grizzly Creek, Garfield County. IMT 1 (GB Team 1). One mile east of Glenwood Springs, CO. Timber and brush. Extreme fire behavior with crowning, running and long-range spotting. Energy and transportation infrastructure and numerous structures threatened. Evacuations, area, road and trail closures in effect.

Williams Fork, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. IMT 1 (GB Team 2). Fifteen miles southwest of Fraser, CO. Timber. Active fire behavior with short crown runs and running. Numerous structures and energy infrastructure threatened. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Pine Gulch, Grand Junction Field Office, BLM. IMT 1 (RM Team 1). Eighteen miles north of Grand Junction, CO. Timber and brush. Active fire behavior with crowning, group torching and spotting. Structures, energy infrastructure and sage-grouse habitat threatened. Evacuations and road closures in effect.

Cameron Peak, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. IMT 2 (RM Blue Team). Fifteen miles southwest of Redfeather Lakes, CO. Timber and closed timber litter. Extreme fire behavior with short crown runs and long-range spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

Waddle Creek, Sheridan County. Twenty-five miles east of Sheridan, WY. Short grass and brush. Active fire behavior with running, spotting and backing. Structures and energy infrastructure threatened. Evacuations in effect.

High Bull, Pine Ridge Agency, BIA. Seven miles northeast of Pine Ridge, SD. Grass and timber. Minimal fire behavior.

Predictive Services Discussion: The Four Corners High will continue to slightly weaken as it begins to drift south. Scattered afternoon storms will remain possible along its northern edge over eastern Oregon, Idaho, Montana, and Wyoming where winds will be breezy during the afternoon period. Scattered storms will also be possible along the Rocky Mountain Front in Colorado and New Mexico while isolated storms will be possible further west across Arizona and Southern California. Below average temperatures will continue across the East as a weakening trough of low pressure remains anchored over the Mississippi River Valley. Scattered storms will remain possible across the Southeast along a weakening stationary front situated over Florida.

Serious Injury Procedures

Firefighter Health & First Aid

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the Incident Commander, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
 - Number of people injured
 - Type of injuries
 - Severity of injuries (light, moderate, severe, life threatening)
 - Mechanism of injury
 - Vital signs (pulse, respiration, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.
