Predictive Services Discussion: The high pressure ridge building inland from the West Coast will strengthen as it moves east toward the Great Basin where it will become more established over the western portion of the region by afternoon. Temperatures will rise to be well above normal. This will mark the beginning of an extended late-season heat wave. Monsoonal activity in the Southwest will cease. Gusty northwesterly winds will continue across central-eastern Montana through North Dakota in the wake of the previous day's frontal passage. In the East, scattered storms are expected across the southeastern portion of the Great Plains as a frontal boundary moves east toward the Mississippi River. In the Northeast, gusty southwesterly winds will continue across the states along the Canadian Border as a cold front moves east across New England. Scattered storms will be possible along the Atlantic Seaboard from Virginia south into central Florida.

Aircraft and Pilot Carding<br>Aviation Category

Every aircraft and pilot used in support of a Federal wildland fire mission must have a current Aircraft and Pilot Card or letter of authorization. The card must be held in the aircraft or with the pilot, and give specific authorization to do the mission being requested.
These missions could be all, one, or any number of missions as follows:

- Air attack (Level I, Level II, Level III).
- Reconnaissance.
- Fire surveillance.
- Water Delivery (buckets).
- Helitorch.
- Cargo.
- Longline.
- PSD Operations.

Every pilot who flies a properly carded aircraft must possess a current Interagency Airplane or Helicopter Pilot Qualification Card that gives specific authorization to fly the type of mission being requested and for the specific type of aircraft being used for the mission. These missions could be all or any number of missions as follows:

- Air attack.
- Reconnaissance.
- Fire surveillance.
- Low-level.
- Paracargo.
- Mountain/Remote airstrips.
- Smokejumper.
- Longline.

Before the aircraft and pilot can be used for a specific mission, the aircraft must be specifically listed on a valid and current contract for the type of work being performed and a copy of the contract must be onboard the aircraft.
Each user of the aircraft and pilot has the authorization to physically inspect the Aircraft Data Card, the Interagency Airplane or Helicopter Pilot Qualification Card, and the contract. If any one of these three is not available for inspection, the mission must be canceled or at least postponed until the authorizations of the aircraft, pilot, or contract can be determined.
Pilots have very specific and closely monitored duty time and flight time limitations that users must understand and adhere to:

- 14-hour duty day
- 8 hours flight time per day
- 2 days off in 14 calendar days
- 36 hours cumulative flight hours in any 6 consecutive days
