Predictive Services Discussion: Very hot, dry, and unstable conditions will be present along the West Coast states, southern Great Basin, and Arizona as the high pressure ridge begins to retreat to the West and weaken slightly. Overnight humidity recoveries in these areas will again be poor. To the northeast, the upper level winds will increase in response to an approaching trough. This will produce breezy conditions across eastern Oregon, Washington, Idaho, and Western Montana to go along with low afternoon humidity levels and will make today a borderline critical fire weather day. In the East, a breezy westerly flow will continue across the northern tier from Minnesota to New England. Slight cooling will occur across the Deep South as a very weak frontal boundary moves east from the Tennessee River Valley to the Atlantic Coast.

## The 10 Standard Fire Orders

Operational Engagement Category

The orders are arranged according to their importance and grouped in a logical sequence. Review and consider Standard Fire Orders as a part of every shift.

- Did you receive or request an adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, and/or local factors?
- Do you have a map of the fire? Are topography, type of fuels, and direction of the spread defined?
- The Fire Behavior group deals with what the firefighter will encounter - weather, fire status, and fire behavior.

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.

- Are you familiar with direction, distance, location, size of escape routes, and safety zones?
- Discuss the need for a lookout, such as extreme fire behavior, and fire located out of line-of-sight.
- Discuss the importance of situational awareness.
- The Fireline Safety group emphasizes personal safety.

4. Identify escape routes and safety zones, and make them known.
5. Post lookouts when there is a possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.

- Review the importance and means of passing tactical decisions and resource movement.
- Review other factors influencing potential changes in tactics, which could affect control of your forces.
- The Organizational Control group is centered around tactical decisions.

7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and ensure they are understood.
9. Maintain control of your forces at all times.

- After you have considered, discussed and acted on the previous nine orders:

10. Fight fire aggressively, having provided for safety first.
