# National Interagency Coordination Center Incident Management Situation Report <br> Saturday, September 12, 2020 - 0730 MDT <br> National Preparedness Level 5 

## National Fire Activity:

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (65 new fires)
0
2
75
341723

Nationally, there are 31 large fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington, D.C.

NIMO (Reinarz) has been assigned to provide wildland fire support to California.
Two hundred thirty-three soldiers from the $14^{\text {th }}$ Brigade Engineer Battalion based out of Joint Base LewisMcChord, Washington are deployed in support of the August Complex.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Fairchild AFB (Spokane, WA), in support of wildland fire operations.

Two MAFFS C-130 airtanker and support personnel each from the 153rd Airlift Wing (Wyoming Air National Guard) and the 146th Airlift Wing (California Air National Guard) have been deployed to support wildland fire operations in California.

Three wildland fire suppression crews and three overhead personnel from Quebec, Canada are supporting fire suppression efforts in the Northern California Area.

| Active Incident Resource Summary |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

## Northern California Area (PL 5)

| New fires: | 12 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 19 |
| Area Command: | 1 |
| NIMOs committed: | 1 |
| Type 1 IMTs committed: | 6 |
| Type 2 IMTs committed: | 3 |

North Complex, Plumas NF, USFS. Unified command between IMT 1 (CA Team 4) and IMT 1 (Cal Fire Team 4). One mile southwest of Crescent Mills, CA. Timber and brush. Active fire behavior with running, spotting and isolated torching. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

Slater, Klamath NF, USFS. IMT 2 (CA Team 10). IMT 1 (NR Team 2) mobilizing. IMT is also managing the Devil fire. Five miles northeast of Happy Camp, CA. Timber and brush. Active fire behavior with flanking, backing and isolated torching. Community of Happy Camp and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Devil, Klamath NF, USFS. Five miles north of Seiad, CA. Timber. Active fire behavior with flanking, backing and isolated torching. Community of Seiad threatened. Evacuations, area, road and trail closures in effect.

August Complex (2 fires), Mendocino NF, USFS. Area Command (Jalbert). Unified command between IMT 1 (CA Team 5), IMT 1 (GB Team 2) and IMT 1 (Cal Fire Team 5). Fourteen miles northwest of Elk Creek, CA. Timber, chaparral and tall grass. Active fire behavior with backing, flanking and creeping. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Red Salmon Complex (2 fires), Six Rivers NF, USFS. NIMO (Quesinberry) and IMT 2 (CA Team 14). Fourteen miles northeast of Willow Creek, CA. Timber and closed timber litter. Active fire behavior with torching, uphill runs and spotting. Several communities threatened. Evacuations, area, road and trail closures in effect.

Fork, Eldorado NF, USFS. IMT 2 (SW Team 4). Fifteen miles northeast of Pollock Pines, CA. Timber. Active fire behavior with wind-driven runs and backing. Structures threatened. Evacuations have been lifted. Area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Butte/Tehama/Glenn Complex (3 fires), Butte Unit, Cal Fire. Two miles northwest of Oroville, CA. Timber, brush and tall grass. Moderate fire behavior. Residences threatened. Evacuations, area, road and trail closures in effect.

Oak, Mendocino Unit, Cal Fire. Transfer of command from IMT 1 (Cal Fire Team 5) back to the local unit occurred yesterday. Six miles north of Willits, CA. Timber and short grass. Minimal fire behavior with smoldering. Numerous structures threatened. Evacuations and road closures in effect.

Willow, Nevada-Yuba-Placer Unit, Cal Fire. Six miles west of Dobbins, CA. Timber, chaparral and tall grass. Minimal fire behavior with creeping and smoldering. Several communities and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Woodward, Point Reyes National Seashore, NPS. Three miles southwest of Olema, CA. Timber, brush and chaparral. Minimal fire behavior with creeping and smoldering. Structures and communication infrastructure threatened. Area, road and trail closures in effect.

CZU Aug Lightning Complex, San Mateo-Santa Cruz Unit, Cal Fire. Eight miles east of Pescadero, CA. Timber, chaparral and closed timber litter. Minimal fire behavior with backing, creeping and smoldering. Numerous residences and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

SCU Lightning Complex, Santa Clara Unit, Cal Fire. Transfer of command from IMT 1 (Cal Fire Team 6) back to the local unit occurred yesterday. Five miles southwest of Brentwood, CA. Timber, chaparral and tall grass. Minimal fire behavior. Area and trail closures in effect.

LNU Lightning Complex (2 fires), Sonoma-Lake Napa Unit, Cal Fire. Two miles north of Barro, CA. Timber, chaparral and tall grass. Minimal fire behavior with smoldering and creeping. Area and trail closures in effect.

W-5 Cold Springs, Northern California District, BLM. Eleven miles east of Madeline, CA. Timber and brush. Minimal fire behavior with smoldering.

## Southern California Area (PL 5)

| New fires: | 22 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 8 |
| Area Command: | 1 |
| Type 1 IMTs committed: | 5 |
| Type 2 IMTs committed: | 2 |

Area Command Team (Sexton) has been mobilized to support wildland fire in southern California.
Creek, Sierra NF, USFS. Unified command between IMT 1 (Cal Fire Team 1) and IMT 1 (GB Team 1). Thirtyfive miles northeast of Clovis, CA. Timber, chaparral and tall grass. Active fire behavior with flanking, torching and spotting. Several communities and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

El Dorado, San Bernardino Unit, Cal Fire. IMT 2 (CA Team 11). Three miles northeast of Yucaipa, CA. Timber, chaparral and tall grass. Active fire behavior with backing, flanking and single tree torching. Several communities and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Bobcat, Angeles NF, USFS. IMT 1 (CA Team 1). Twelve miles northeast of Pasadena, CA. Chaparral, brush and tall grass. Active fire behavior with uphill runs, torching and spotting. Several communities, communications and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Dolan, Los Padres NF, USFS. IMT 1 (PNW Team 2). Ten miles south of Big Sur, CA. Timber, brush and chaparral. Active fire behavior with uphill runs, wind-driven runs and flanking. Numerous residences and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.

SQF Complex (2 fires), Sequoia NF, USFS. IMT 1 (NR Team 1). Thirty-three miles east of Porterville, CA. Timber and chaparral. Active fire behavior with short crown runs, group torching and long-range spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Valley, Cleveland NF, USFS. IMT 2 (CA Team 15). Nineteen miles northeast of Chula Vista, CA. Chaparral and tall grass. Active fire behavior uphill runs, creeping and smoldering. Several communities, communication and energy infrastructure threatened. Evacuations have been lifted. Area, road and trail closures in effect.

Moraine, Sequoia \& Kings Canyon NP, NPS. Five miles northeast of Kanawyers, CA. Timber and brush. No new information.

## Northwest Area (PL 5)

| New fires: | 8 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 24 |
| Area Command: | 1 |
| Type 1 IMTs committed: | 4 |
| Type 2 IMTs committed: | 8 |

Area Command Team (Stutler) has been mobilized to support wildland fire in northwest Oregon.
Riverside, Mt. Hood NF, USFS. IMT 1 (SW Team 1). Eight miles southeast of Estacada, OR. Timber, brush and short grass. Moderate fire behavior with creeping, single tree torching and isolated torching. Several communities threatened. Evacuations, area, road and trail closures in effect.

Beachie Creek, Willamette NF, USFS. IMT 2 (NW Team 13). Six miles north of Detroit, OR. Timber. Moderate fire behavior with spotting, smoldering and backing. Several communities and communication infrastructure threatened. Evacuations, area, road and trail closures in effect.
S. Obenchain, Medford Unit, Oregon DOF. IMT 2 (PNW Team 8). Five miles east of Eagle Point, OR. Timber and brush. Active fire behavior with uphill runs, group torching and wind-driven runs. Several communities threatened. Evacuations and road closures in effect.

Holiday Farm, Willamette NF, USFS. IMT 1 (ODF Team 3). Thirty-five miles east of Eugene, OR. Timber and brush. Moderate fire behavior with flanking and backing. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Lionshead, Warm Springs Agency, BIA. IMT 1 (PNW Team 3). IMT is also managing the White River and P515 fires. Twenty miles west of Warm Springs, OR. Timber. Active fire behavior with flanking, torching and short-range spotting. Several communities and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

White River, Mt. Hood NF, USFS. Twenty miles west of Wamic, OR. Timber. Minimal fire behavior with creeping, single tree torching and smoldering. Residences threatened. Area, road and trail closures in effect.

P515, Warm Springs Agency, BIA. Seventeen miles west of Warm Springs, OR. Timber and brush. Minimal fire behavior. Area, road and trail closures in effect.

Almeda Drive, Medford Unit, Oregon DOF. Started on private land one mile north of Ashland, OR. Timber, brush and tall grass. Active fire behavior with backing and creeping. Several communities threatened. Evacuations, area and road closures in effect.

Archie Creek, Umpqua NF, USFS. IMT 2 (NW Team 9). Twenty miles east of Glide, OR. Timber and brush. Active fire behavior with long-range spotting, group torching and short crown runs. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Two Four Two, Fremont-Winema NF, USFS. IMT 1 (ODF Team 2). Six miles northeast of Chiloquin, OR. Timber, brush and tall grass. Extreme fire behavior with group torching, short crown runs and spotting. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Inchelium Complex (3 fires), Colville Agency, BIA. IMT 2 (NW Team 7). One mile north of Inchelium, WA. Timber, brush and short grass. Moderate fire behavior with flanking, backing and group torching. Numerous structures threatened. Evacuations in effect.

Big Hollow, Gifford Pinchot NF, USFS. IMT 2 (NW Team 12). Twenty miles north of Stevenson, WA. Timber. Moderate fire behavior with creeping, backing and flanking. Residences threatened. Evacuations, area, road and trail closures in effect.

Echo Mtn. Complex, Toledo Unit, Oregon DOF. Four miles east of Lincoln City, OR. Timber, brush and tall grass. Moderate fire behavior with creeping, backing and isolated torching. Communities of Otis and Lincoln City threatened. Evacuations and road closures in effect.

Whitney, Northeast Region, Washington DNR. IMT 2 (NW Team 10). IMT is also managing the Babb and Manning Rd. fires. Started on private land six miles northwest of Davenport, WA. Timber, brush and tall grass. Minimal fire behavior with creeping and smoldering. Numerous structures threatened. Evacuations and road closures in effect.

Babb, Northeast Region, Washington DNR. Thirty miles northwest of Colfax, WA. Timber, brush and tall grass. Minimal fire behavior with torching, smoldering and creeping. Structures threatened. Evacuations in effect.

Manning Rd, Washington State Fire Marshal's Office. Five miles northwest of Colfax, WA. Timber, brush and tall grass. Minimal fire behavior with torching, creeping and smoldering. Structures threatened. Reduction in acreage due to more accurate mapping.

Apple Acres, Southeast Region, Washington DNR. Three miles northeast of Chelan, WA. Timber, brush and short grass. Minimal fire behavior with backing, creeping and smoldering. Area and road closures in effect. Reduction in acreage due to more accurate mapping.

Pearl Hill, Washington State Fire Marshal's Office. IMT 2 (NW Team 6). Four miles east of Okanogan, WA. Brush and tall grass. Moderate fire behavior with backing, flanking and creeping. Numerous structures and communication infrastructure threatened. Evacuations, area and road closures in effect.

Brattain, Fremont-Winema NF, USFS. IMT 2 (SA Gold Team) mobilizing. Eight miles south of Paisley, OR. Timber, brush and short grass. Active fire behavior with short crown runs, group torching and spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

Evans Canyon, Southeast Region, Washington DNR. Started on county land eight miles northwest of Naches, WA. Timber, brush and tall grass. Minimal fire behavior with smoldering or creeping.

Cold Springs, Colville Agency, BIA. Four miles southeast of Omak, WA. Brush and grass. Active fire behavior with uphill runs, flanking and backing. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Customs Road, Northeast Region, Washington DNR. Started on private land one mile northwest of Curlew, WA. Timber, brush and tall grass. Active fire behavior with single tree torching, creeping and backing. Numerous structures threatened. Evacuations have been lifted. Reduction in acreage due to more accurate mapping.

Sumner Grade, Washington State Fire Marshal's Office. Four miles west of Sumner, WA. Timber, brush and tall grass. Moderate fire behavior with smoldering and single tree torching. Numerous structures threatened. Evacuations in effect.

Star Mountain Ln., Central Unit, Oregon DOF. Started on BLM land three miles northeast of Glide, OR. Timber. No new information. Last report unless new information is received.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.
***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: An upper high pressure is centered over the Great Basin as an upper low over the eastern Pacific approaches the western United States. Under the high pressure ridge, generally diurnal winds will prevail. Weak onshore flow will allow relative humidity to trend upward across the low lying coastal areas west of the Cascades. Relative humidity will be critically dry across mid elevations of the western mountain ranges. Conditions will also be critically dry across the inland Pacific Northwest, western Great Basin, and southern California. Isolated critical Temperatures will continue to trend upward across the western United States, though widespread smoke across much of California, the Pacific Northwest, Northern Rockies, and the northern Great Basin will suppress high temperatures. Rain and thunderstorms will impact the Midwest, Great Lakes, and southeastern United States.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

## Tuolumne Fire

Incident Summary: September $12^{\text {th }} 2004$ - The Tuolumne Fire is reported by a Stanislaus lookout at 1233 hours. Dispatch initiates a standard response, including the dispatch of a helicopter with helitack crew. 1259 Air Attack (ATGS) arrives over fire and reports fire to be between 5-10 acres, spreading up-slope and up-canyon with a steady $3-5 \mathrm{mph}$ wind. The fire is burning near the bottom of the Tuolumne River Canyon, just upstream of a major river confluence at 1450' elevation in light, flashy fuels, predominantly oak leaf litter, light grass and mixed brush with an oak overstory consistent with Fuel Model 2. FDFM (Fine Dead Fuel Moisture) is $4-5 \%$ and live fuel moistures at critical stage. Temperature is $89-94^{\circ} \mathrm{F}, \mathrm{RH} 18-24 \%$, and there is no frontal or thunderstorm activity. The canyon is very steep, observed to be $80-120 \%$ slope. At approximately 1335 the helitack crew begins constructing downhill fireline. 10 minutes later they take emergency action when a sudden wind shift that causes a fire flare-up which overruns their position. Of the 7 person crew, 3 firefighters suffer minor injuries and one firefighter is killed.

1305 the helicopter arrives over the fire and drops the crew on a gravel bar $3 / 4$ mile downstream of the fire. They hike from the LZ up-canyon to a dirt road that parallels the river and walk the road toward the right flank of the fire. The fire is burning both above and below the road. Their helicopter is directed to begin dropping water on right flank above the road.
A local Division Chief is dispatched to the fire to be IC and drives past the helitack crew to the right flank. He observes a slow backing fire and returns to the location of the helitack crew, who are still hiking. Talking with the helitack captain, he does not identify himself as IC, announce a strategy or specific tactics. He does state that he wants the crew to find a safe anchor point but the crew understands him to want them to "anchor this fire on the right flank, the road down to the river".
1335 the crew arrives at the right flank on the road and looks for access to the river and safe access to the bottom of the fire.
ATGS and IC decide to continue to use the helicopter on the right flank above the road. The helitack captain hears this exchange on the radio.
ATGS receives a radio call about a spot fire and misses discussion about helitack crew working below the road. (In a post-incident interview, the ATGS will state that he thought the crew was above the road.)
After scouting down the right flank about 70 feet, it is decided to construct indirect fire line downhill for 250 300 ft to the river, burning out from the road as they go. Safety zones are identified as down to the river, up to the road or into the black. All crew members agree with the plan and inform their helicopter pilot.
An engine is assigned to support the helitack crew. The crew is not notified that the engine was assigned to support them and that it was close by.

1340 firefighters located about 30ft down the line from the road remark that the burn out is pulling in nicely. There is a "flutter" in the wind and the 3 firefighters closest to the road are told to grab backpack pumps just in case.
1345 a sudden wind shift causes the fire to flare-up, change direction, and overrun the crew. 30 seconds later one crew member is dead. No fire shelters are deployed.

## Lessons Learned Discussion Points

- During size-up, what fire behavior did the personnel observe? If you were at a fire in a similar setting, what local terrain features and other factors might lead you to distrust the fire behavior seen?
- It is common for people to have communication problems. On an incident where these issues can easily compromise anyone's life safety, what are you going to do to minimize communication errors ...as a Crew member? Crew boss? Pilot? IC?
- Your crew has been dispatched to this fire. How will you handle the "Lookout" aspect of LCES? It is common to hear that "everyone on the crew is a lookout". Discuss what each person must do to make this an effective alternative to the "traditional" lookout.
- This fire had an Air Attack and a helicopter. Discuss if and how aerial resources can be used as additional lookouts and sources of information. What are some downfalls to using them in this role?
