***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.

Predictive Services Discussion: Rain showers will move into northwest Oregon and will remain mainly along and west of the Cascades. Relative humidity will trend upwards across the Pacific Northwest. Though precipitation will not be widespread, there will be a slight improvement in conditions due to the increasing relative humidity, with the greatest increase along and west of the Cascades. Even with the gradual upward trend of relative humidity, conditions will remain critically dry across much of eastern Oregon, California, the Great Basin, and western Montana. Gusty winds will develop this afternoon across northeast California, eastern Oregon, northern/central Great Basin, and western Montana. Winds will be in the 20-25 mph range. Dense smoke impacts will continue across the west.

Fuel Handling
Miscellaneous Fireline Hazards

## Fuel Handling - Watch Out for "Normalization"

There is an apprehension that the safety concerns surrounding the use of gasoline in firefighting operations can get "normalized". In firefighting, we use gasoline for a variety of applications, including pumps, chainsaws, vehicles, drip torches, etc.
"Normalization" of hazards or risks is when we get comfortable around these hazards and take shortcuts without consequence. After a while, we can get so comfortable with these shortcuts that we forget about the original mitigation to reduce the hazard or risk.

1. What do we use gasoline for in our firefighting operations?
2. What risks are associated with our uses of flammable liquids?
3. What mitigations or procedures are in place for handling fuel?
4. What can you do to prevent being sprayed or doused in gasoline from gas tank pressure?
5. What should you do to extinguish someone who is on fire?

## Chainsaw Operators:

Watch this short safety video for information on preventing fuel leakage, identification of potential vapor lock/tank pressurization, mitigation measures for vapor lock/tank pressurization, and reporting procedures for future occurrences: Chainsaw Safety.
