Predictive Services Discussion: A strong upper-level trough will bring wetting rain along and west of the Cascades and in portions of northeast Washington, Idaho Panhandle, and northwest Montana. Periodic showers are also likely across the inland Pacific Northwest, northwest California, and Northern Rockies. Gusty winds and low RH are expected along the Sierra Front and portions of the Great Basin into the central and northern Rockies. Isolated thunderstorms are possible from south-central Colorado to the Mogollon Rim. Heavy rain is expected across Louisiana and the Lower Mississippi Valley as remnants of Tropical Storm Beta moves over the region. Showers and thunderstorms are likely across the northern Prairies and western Great Lakes as a cold front moves into the region.

Aviation Mishap Response<br>Aviation Category

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Response plans have to be briefed to all on the crew.

- Immediate, positive action is necessary. Any delay may affect someone's chances of survival.
- Conduct rescue operations keeping the following priorities in mind:
- Preserve life. Rescuers first!!!
- Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.
- Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.
- Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.
- Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire.
- Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site.
- Do not exceed your physical limitations.

Activity: Review your unit's mishap response plan with the crew. Consider practicing with a crash rescue drill or scenario.
