Predictive Services Discussion: Northwest flow will strengthen aloft over the Northern Rockies and Plains as a mid-level shortwave trough moves from the Pacific Northwest into the Northern Rockies and an upper-level trough drops south across western Canada. Dry, windy downslope flow is expected in central and eastern Montana into the Dakotas and Wyoming. A cold front will move southeast into Texas, the Southeast, and Ohio and Tennessee Valleys. Rainfall is expected in the Great Lakes, Mid-Atlantic, and Northeast with thunderstorms stretching from Florida to along the Carolinas' coast.

AAR part 2
Fire Communication Category

## The "Chainsaw" After Action Review

It's 0'dark thirty. The crew has worked the fire for sixteen hours straight. No one has eaten a hot meal for days and oh yeah, you might as well be cold. No time for the After Action Review? -- Think again!

It's time to bust out the ...CHAINSAW AAR.
The idea behind the Chainsaw AAR is simple; SPEED. When you need to get an After Action Review done quickly try this simple format.

1. Have the team form a loose circle.
2. Start with a single team member and ask one of these questions:

- What is one thing that went well on this shift?
- What is one thing that went bad on this shift?
- What is one thing you would do different next time?
- What is one thing you learned today?

3. Continue around the circle until everyone has had a chance. It may be necessary to place a time limit on each individual (i.e. 30 seconds).
4. Avoid unnecessary discussion (dinner is waiting).
5. Note the comments for future discussion.
