**Predictive Services Discussion:** Upper-level troughing will develop and strengthen across the West today with dry and breezy conditions across much of the High Plains and portions of the Great Basin and Desert Southwest. Central and southern Montana will likely have the greatest overlap of critical winds and relative humidity. Light precipitation may begin to fall late tonight in western portions of the Pacific Northwest. Showers and thunderstorms are likely across much of the Gulf Coast and into the Southeast ahead of Hurricane Delta in the central Gulf of Mexico.

Look at the times below...if your fire blew up right now, can you and every member of your crew make it to your safety zone?
