## Predictive Services Discussion:

High pressure will continue to build across the western US. Though winds will remain elevated across the High Plains, Colorado, and the Southwest, wind speeds will begin to trend downwards. The main concern on Thursday is moderately strong northerly and offshore winds across northern and central California. There is the potential for some wind-prone areas to experience near or above 60 mph peak gusts Wednesday and Thursday nights. Showers are likely along and ahead of the cold front sweeping southeast from the Great Lakes to the southern Plains.

In fast-moving, dynamic situations, top-level decision-makers cannot always incorporate new information into a formal planning process and redirect people to action within a reasonable timeframe.

We provide leader's intent so people closest to the scene of action can adapt plans and exercise initiative to accomplish the objective when unanticipated opportunities arise or when the original plan no longer suffices.

Leader's intent is a crucial element of effective operations because it reduces internal friction and empowers subordinates - even when chaotic conditions prevent the chain of command from communicating effectively.

Leader's intent is a clear, concise statement about what people must do to succeed in their assignments. It delineates three essential components:

1. Task - what is the objective or goal of the assignment?
2. Purpose - why the assignment needs to be done.
3. End state - how the situation should look when the assignment is successfully completed.

Within the framework of the defined end state, leaders can develop plans that include incident objectives, priorities, strategies, trigger points, and contingency plans.

## Discussion Points

- How were you most recently provided leader's intent?
- Describe a situation where leader's intent was utilized to adapt and achieve the desired end state.
- Describe a situation where leader's intent was not clear.
- Discuss how to gain leaders intent if it is not initially provided.
