Predictive Services Discussion: Northwesterly flow will increase from the Pacific Northwest and over the Rocky Mountains as an upper-level trough strengthens over the Great Lakes. Gusty northerly and offshore winds will begin to weaken across California during the day. Precipitation, including snow in places, is expected from the Pacific Northwest into the Great Lakes as another cold front drops south out of Canada with a developing surface low in the northern Plains. A cold front will continue moving east and south through the eastern US with showers likely along and behind the front.

Introducing a New Category of Topics

Aviation/Airtanker category

This new group of safety topics has been created by airtanker personnel and the Interagency Airtanker Base Subcommittee ([IABS](#)) for those of you in the field that work around airtankers and at tanker bases with the purpose of addressing the hazards and safety considerations specific to airtanker base operations.

The current list of topics are:

- Emergencies On The Ramp
- Foreign Objects and Debris (FOD)
- Hot Loading
- Jet and Prop Blast
- Spills
- Wing Walking
- Mixing Airtanker Types
- Marshalling Aircraft in Low Light Conditions
- Simultaneous Loading & Fueling (SL&F)

The Airtanker topics will not be posted on the 6MFS calendar. However, they are available in the list of topics found at <https://www.nwcg.gov/committee/6mfs>.
