# National Interagency Coordination Center <br> Incident Management Situation Report <br> Thursday, October 22, 2020 - 0730 MDT <br> National Preparedness Level 3 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires:***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (31 new fires)
1
1 35

Nationally, there are 27 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
NIMO (Houseman) has been assigned to COVID-19 support at Forest Service headquarters in Washington, D.C.

NIMO (Reinarz) has been assigned to provide wildland fire support to California.
Five fire suppression crews and four overhead personnel from Mexico are supporting fire suppression efforts in southern California

## Rocky Mountain Area (PL 4)

New fires: 1
New large incidents: 0
Uncontained large fires: 8
Area Command: 1
Type 1 IMTs committed: 3
Type 2 IMTs committed: 2
Area Command Team (Jalbert) has been mobilized to support wildland fire in Colorado.
Cameron Peak, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. IMT 1 (RM Team 1). Fifteen miles southwest of Redfeather Lakes, CO. Timber. Active fire behavior with short crown runs, winddriven runs and single tree torching. Several communities threatened. Evacuations, area, road and trail closures in effect.

Calwood, Boulder County. Ten miles northwest of Boulder, CO. IMT 2 (RM Team Black). IMT is also managing the Lefthand fire. Timber, brush and short grass. Moderate fire behavior with isolated torching, backing and creeping. Several communities threatened. Evacuations, area, road and trail closures in effect.

Lefthand, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. One mile east of Ward, CO. Timber. Moderate fire behavior with backing, creeping and smoldering. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

East Troublesome, Medicine Bow-Routt NF and Thunder Basin National Grassland, USFS. Transfer of command from IMT 2 (NR Team 6) to IMT 1 (PNW Team 3) will occur today. IMT is also managing the Williams Fork fire. Seventeen miles northeast of Kremmling, CO. Timber and grass. Extreme fire behavior with short crown runs, group torching and short-range spotting. Numerous structures, infrastructure and sagegrouse habitat threatened. Evacuations, area, road and trail closures in effect.

Williams Fork, Arapaho and Roosevelt NF and Pawnee National Grassland, USFS. Fifteen miles southwest of Fraser, CO. Timber. Moderate fire behavior with single tree torching and short-range spotting. Several communities and energy infrastructure threatened. Area, road and trail closures in effect.

Ice, San Juan NF, USFS. Five miles west of Silverton, CO. Timber and short grass. Moderate fire behavior with single tree torching, spotting and backing. Structures and energy infrastructure threatened. Area, road and trail closures in effect.

Middle Fork, Medicine Bow-Routt NF and Thunder Basin National Grassland, USFS. Ten miles north of Steamboat Springs, CO. Timber. Moderate fire behavior with backing, single tree torching and spotting. Structures and energy infrastructure threatened. Area, road and trail closures in effect.

Mullen, Medicine Bow-Routt NF and Thunder Basin National Grassland, USFS. IMT 1 (SA Blue Team). Thirtyeight miles west of Laramie, WY. Timber. Minimal fire behavior with isolated torching, creeping and isolated torching. Several communities and infrastructure threatened. Evacuations, area, road and trail closures in effect.

***Prescribed fire acres are for reference only and may not reflect the most up-to-date information.
***Official prescribed fire accomplishment reporting occurs through agency specific systems of record.
Predictive Services Discussion: An upper-level trough will move over the Northern Rockies and northern Plains today. An associated cold front will move through the Great Basin and northern California before stalling across the southern Great Basin. Dry and windy conditions are expected ahead of the front in the southern Great Basin, Southwest, Colorado, and southern High Plains with gusty northerly and offshore winds in northern California. A surface cyclone will deepen and track northeast from the central Plains into the Great Lakes with a cold front sliding south across the Plains and portions of the Upper Midwest with a warm front lifting north over the eastern Great Lakes. Precipitation will stretch across the Midwest into the Great Lakes as a result.

Hazard Tree - Risk Management<br>Felling Safety Category

Consider the severity, probability, and exposure of hazard tree problems continually as you perform duties in forested communities. Remember to look for hazard tree risks at staging areas, parking areas, and camping areas.

## - Environmental Element:

- Existing winds and forecast.
- Night operations or low visibility situations limiting your view of surroundings.
- Steep slopes.
- Diseased or bug-kill areas with high densities of dead or dying trees.
- Number, density, and height of hazard trees.
- Amount of time the area has been burning - burn down time.
- Potential for domino effect to surrounding trees.
- Hazard Tree Indicators:
- Trees burning for any period of time.
- High-risk tree species (rot and shallow roots).
- Numerous downed trees in the area.
- Dead, broken, or burning tops and limbs overhead.
- Accumulation of downed limbs.
- Fungus or growth of decay species on the tree.
- Cavities or evidence of woodpecker damage.
- Forked tops, multiple tops, and/or uneven branch distribution.
- Absence of needles, bark, or limbs.
- Leaning or hung-up.

## - Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating "No Work Zones" (NWZ) - (flag, sign, and map).
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area.
- Post lookouts to help maintain a secure area.
- Fireproof potential hazard trees to prevent ignition.
- Initiate road/traffic control and area closure.
- Keep clear of bucket drops near trees/snags.
- Establish trigger points for reposition to secure areas in response to high winds.
- Minimize exposure time in hazard tree areas using efficient felling techniques and limiting numbers of personnel in hazardous areas.
