

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, February 5, 2021 – 0800 MDT  
National Preparedness Level 1**

**National Fire Activity (January 29, 2021 – February 4, 2021):**

Initial attack activity:	Light (221 new fires)
New large incidents:	6
Large fires contained:	6
Uncontained large fires:***	0
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion:** Arctic air will slide south from Canada across much of the CONUS, especially along and east of the Rockies, during the upcoming week. This will lead to well below normal temperatures across most of the Plains, Midwest, western Great Lakes, and Ohio Valley for the next week. Heavy snow is likely in parts of the Midwest, Great Lakes, and Northeast as well. Upper lows will track along the periphery of the upper-level ridge into the Pacific Northwest, Northern Rockies, and into the Colorado Rockies bringing snow to the mountains and some basins and valleys.

The upper-level ridge over the northeast Pacific and West Coast will retreat westward and eventually weaken next week. California and the southern half of the West are likely to remain mostly dry, but there are chances of scattered precipitation mid to late next week as the upper-level ridge weakens off the West Coast. Dry and breezy conditions are likely at times across the southern High Plains through this weekend and possibly into next week.

# LEAD Time

**Building the Team**  
*Leadership Category*

Fire leaders build cohesive teams—not simply groups of individuals putting forth individual efforts—to accomplish missions in high-risk environments. Cohesive teams are more creative and adaptable when dealing with complex situations. This enables them to detect and mitigate errors before irreparable damage occurs. Cohesion allows team members to anticipate the needs and actions of other team members. This increases efficiency and saves time. Fire leaders set the stage by creating an environment in which cohesive teams thrive: establishing a foundation of trust, enabling healthy conflict, requiring commitment, setting an expectation of accountability, and bringing focus to the team result.

## **Discussion Points:**

- What is the difference between a team and a group?
- How does command climate positively and negatively affect team performance?
- How does cohesion influence team performance?
- Why is trust so important in team building?
