

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, April 29, 2021 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (102 fires)
New large incidents:	1
Large fires contained:	1
Uncontained large fires: ***	6
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2

Nationally, there are 2 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average Fires (2011 – 2020 as of today)	15,881
Ten Year Average Acres (2011 – 2020 as of today)	826,842

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: Temperatures will warm to above average across much of the West, especially over the West Coast, as an upper-level ridge builds over the region. Very low relative humidity will accompany these conditions with breezy winds overlapping some of these dry conditions. Rain and potentially heavy rain will continue to spread northeast from central Texas through the Ohio and Tennessee Valleys into the Mid-Atlantic and Northeast. Precipitation is likely across portions of the Alaska Interior and Panhandle.
