

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, May 20, 2021– 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (121 fires)
New large incidents:	2
Large fires contained:	4
Uncontained large fires: ***	10
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 2 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)

New fires: 10
 New large incidents: 0
 Uncontained large fires: 4

Tussock, Phoenix District Office, BLM. Eight miles southwest of Crown King, AZ. Brush. Minimal fire behavior with smoldering. Communication infrastructure threatened. Area, road and trail closures in effect.

Three Rivers, Lincoln NF, USFS. Twelve miles northwest of Ruidoso, NM. Short grass and timber. Minimal fire behavior. Numerous structures threatened. Area and trail closures in effect. Reduction in acreage due to more accurate mapping.

Warsaw, Coronado NF, USFS. Twenty miles northwest of Nogales, AZ. Short grass and brush. Minimal fire behavior with smoldering.

Cuervito, Santa Fe NF, USFS. Ten miles east of Pecos, NM. Timber. Minimal fire behavior with creeping and smoldering.

Doagy, Gila NF, USFS. Previously reported incident. Forty-five miles northeast of Silver City, NM. Timber and grass. Moderate fire behavior with flanking, backing and smoldering. Last narrative report unless significant activity occurs.

Predictive Services Discussion: An upper low will move over the Great Basin with broad, deep troughing over the West today. Critical fire weather conditions will develop across the southern Great Basin and into the Southwest and West Slope of Colorado. Dry and breezy conditions are also expected in the Central Valley and surrounding foothills of California. Precipitation is likely over the northern Great Basin and much of the Pacific Northwest and Northern Rockies, including snow in the mountains and potentially down in the valleys at some locations. Rain will spread over the northern Plains into the Great Lakes with heavy rain remaining likely in far east Texas and Louisiana. Warm and dry conditions are expected across much of the South and Mid-Atlantic with high pressure aloft.

Fight Fire Aggressively, Having Provided for Safety First

Operational Engagement Category

Standard Firefighting Order #10 must be considered at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

- Is the suppression method adequate? Are we making progress? Are we beating our heads against a wall? Is there a better way to get this done?
 - Give examples of when you have had to change your suppression method.
- Are there adequate resources and time for effective suppression? Do we need to retreat and reevaluate?
 - Talk about how you dealt with times when you realized you were not making progress on a fire.
- Are lookouts posted? When you post lookouts, who would you choose to be a lookout, and where should they be located?
- Are communications prompt with crews and other resources?
 - Review the importance of effective communications on the fireline.
- Have escape routes and safety zones been established?
 - Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.
- Do you feel comfortable with your assignment?
 - Discuss how you evaluate the situation. Remind firefighters that every individual has the right to question an assignment.
- To reduce the risks:
 - Post lookouts.
 - Establish trigger points.
 - Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
