# National Interagency Coordination Center <br> Incident Management Situation Report <br> Thursday, May 27, 2021- 0730 MDT <br> National Preparedness Level 2 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (151 fires)
2
1
14
0
0
0
2

Nationally, there are 8 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

## Link to Geographic Area daily reports.

Link to Understanding the IMSR.
This report will be posted Monday - Friday at 0730 Mountain time unless significant activity occurs.

Southwest Area (PL 3)
New fires:
New large incidents: 1
Uncontained large fires: 6
Type 2 IMTs committed: 1
Sycamore Canyon, Papago Agency, BIA. IMT2 (SW Team 4) mobilizing. Fifteen miles southeast of Sells, AZ. Grass and brush. Moderate fire behavior with uphill runs, flanking and backing. Structures threatened.

* Drummond, Gila NF, USFS. Four miles west of Kingston, NM. Light slash. Minimal fire behavior with smoldering, creeping and backing. Communication infrastructure threatened. Road and trail closures in effect. Last narrative report unless significant activity occurs.

Warren, Coronado NF, USFS. Nine miles south of Portal, AZ. Grass and brush. Moderate fire behavior with uphill runs, flanking and backing.

Eicks, Soccorro District, New Mexico DOF. Nine miles northeast of Cloverdale, NM. Grass and brush. Moderate fire behavior with backing, creeping and flanking.

Boggy Creek, Apache-Sitgreaves NF, USFS. Fifteen miles southwest of Alpine, AZ. Timber and grass. Minimal fire behavior with backing, creeping and smoldering.

McDonald Tank, Fort Apache Agency, BIA. Twenty-five miles southeast of Whiteriver, AZ. Timber, brush and grass. Active fire behavior with uphill runs, isolated torching, and backing.

Dog, Guadalupe Mountains NP, NPS. Thirty-four miles southwest of Whites City, NM. Timber and grass. Minimal fire behavior with backing, flanking and smoldering. Structures threatened. Area and trail closures in effect.

Johnson, Gila NF, USFS. Thirty-four miles northeast of Silver City, NM. Timber and grass. Moderate fire behavior with wind-driven runs, flanking and backing. Structures threatened. Last narrative report unless significant activity occurs.

Predictive Services Discussion: An upper low will move over the northern Plains while an upper-level trough moves into the Pacific Northwest today. Precipitation will spread over the Midwest into the Great Lakes with severe weather likely across the southern Plains and into the Midwest. Dry and breezy conditions are expected across portions of the Southwest with low relative humidity and above normal temperatures in south Alabama, southern Georgia, and down the Florida Peninsula. A cold front will move through northern and eastern portions of Interior Alaska with freezing temperatures likely overnight.

# Managing Vehicle Traffic in Smoke 

Vehicles/Roads Category

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires, both wildland and prescribed fires, especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements presently in place with those agencies.
- Identification of important public roads that may be impacted by smoke.
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency), and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area.
- Identification of alternative traffic routes as part of the incident/project traffic plan.
- Identification of traffic routes subject to temperature inversions, as well as contributory factors such as fog and ice.
- When potential smoke-related problems are identified:
- Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
- Notify local law enforcement units and highway departments of a potential problem.
- Implement preplanned actions such as posting smoke warning signs.
- Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
