# National Interagency Coordination Center <br> Incident Management Situation Report <br> Thursday, June 3, 2021- 0730 MDT <br> National Preparedness Level 2 

## National Fire Activity:

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (157 fires)
3
4
13
0
0
0
2

Nationally, there are 9 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)
New fires: 8
New large incidents: 0
Uncontained large fires: 7
Type 2 IMTs committed: 1
Mescal, Gila District Office, BLM. IMT 2 (SW Team 5). Twelve miles northeast of Hayden, AZ. Brush. Active fire behavior with running and flanking.

Sycamore Canyon, Papago Agency, BIA. Fifteen miles southeast of Sells, AZ. Grass and brush. Minimal fire behavior with smoldering. Structures threatened.

Wolf Draw, Santa Fe NF, USFS. Eleven miles northwest of Regina, NM. Timber. Minimal fire behavior with single tree torching and creeping and smoldering.

Warren, Coronado NF, USFS. Nine miles south of Portal, AZ. Grass and brush. Minimal fire behavior with smoldering.

Dog, Guadalupe Mountains NP, NPS. Thirty-four miles southwest of Whites City, NM. Timber and grass. Minimal fire behavior with smoldering. Structures threatened. Area and trail closures in effect.

McDonald Tank, Fort Apache Agency, BIA. Twenty-five miles southeast of Whiteriver, AZ. Timber, brush and grass. No new information.

Courthouse, Central District, Arizona DOF. Thirteen miles southwest of Tonopah, AZ. Grass and chapparal. No new information. Last report unless significant activity occurs.

Predictive Services Discussion: An upper-level ridge will break down over the Pacific Northwest today with scattered strong to possibly severe storms expected across central and eastern Oregon into northern Idaho. Isolated to scattered thunderstorms are likely over the Sierra Front into central and northern Nevada and the Four Corners region with better thunderstorm coverage and chances in eastern Arizona, the Colorado Rockies, and New Mexico. Stronger winds are expected to develop along the eastern slopes of the Cascades following thunderstorm development in eastern Oregon and Washington. The axis of well above average to record breaking high temperatures will shift eastward over the Intermountain West, especially the northern half of the Intermountain West. Rain and thunderstorms will continue in much of Texas with thunderstorms, including some severe, in the eastern US.

Fuel Handling

Miscellaneous Fireline Hazards

## Fuel Handling - Watch Out for "Normalization"

There is an apprehension that the safety concerns surrounding the use of gasoline in firefighting operations can get "normalized". In firefighting, we use gasoline for a variety of applications, including pumps, chainsaws, vehicles, drip torches, etc.
"Normalization" of hazards or risks is when we get comfortable around these hazards and take shortcuts without consequence. After a while, we can get so comfortable with these shortcuts that we forget about the original mitigation to reduce the hazard or risk.

1. What do we use gasoline for in our firefighting operations?
2. What risks are associated with our uses of flammable liquids?
3. What mitigations or procedures are in place for handling fuel?
4. What can you do to prevent being sprayed or doused in gasoline from gas tank pressure?
5. What should you do to extinguish someone who is on fire?

## Chainsaw Operators:

Watch this short safety video for information on preventing fuel leakage, identification of potential vapor lock/tank pressurization, mitigation measures for vapor lock/tank pressurization, and reporting procedures for future occurrences: Chainsaw Safety
