# National Interagency Coordination Center <br> Incident Management Situation Report <br> Wednesday, June 9, 2021- 0730 MDT <br> National Preparedness Level 2 

## National Fire Activity:

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (100 fires)
4
4
14
0
0
1
3

Nationally, there are 7 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 3)
New fires: 5
New large incidents: 2
Uncontained large fires: 6
Type 1 IMTs committed: 1
Type 2 IMTs committed: 1
Telegraph, Tonto NF, USFS. IMT 1 (SW Team 2). Five mile southeast of Superior, AZ. Grass and brush. Extreme fire behavior with uphill runs, wind-driven runs and torching. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Mescal, Gila District Office, BLM. IMT 2 (SW Team 5). Twelve miles northeast of Hayden, AZ. Grass, chaparral and brush. Active fire behavior with running, flanking and spotting. Several communities and numerous structures threatened. Evacuations, area and road closures in effect.

Slate, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Active fire behavior with wind-driven runs, isolated torching and spotting. Structures threatened. Road closures in effect.

* Poso, Carson NF, USFS. Eleven miles northeast of El Rito, NM. Timber and slash. Moderate fire behavior with backing, flanking and creeping. Last narrative report unless significant activity occurs.

Wolf Draw, Santa Fe NF, USFS. Eleven miles northwest of Regina, NM. Timber. Minimal fire behavior with smoldering and creeping.

Thompson Canyon, Socorro District, New Mexico DOF. Fifteen miles west of Cliff, NM. Timber and brush. Moderate fire behavior with smoldering and creeping. Residence threatened.

Dog, Guadalupe Mountains NP, NPS. Thirty-four miles southwest of Whites City, NM. Timber and grass. No new information.

* Hobo, Apache-Sitgreaves NF, USFS. Twenty-three miles northeast of Morenci, AZ. Timber, brush and short grass. Moderate fire behavior with backing and uphill runs. Last narrative report unless significant activity occurs.

Johnson, Gila NF, USFS. Previously reported incident. Twenty miles north of Silver City, NM. Timber and grass. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

## Great Basin Area (PL 2)

New fires:
New large incidents:
Uncontained large fires:
Type 2 IMTs committed:
Mammoth, Dixie NF, USFS. IMT 2 (GB Team 5). Twenty miles southwest of Panguitch, UT. Timber. Moderate fire behavior with creeping, single tree torching and smoldering. Numerous residences threatened.
Evacuations, area, road and trail closures in effect.
Bennion Creek, Manti-La Sal NF, USFS. Twenty-three miles northwest of Helper, UT. Brush, chaparral and timber. Active fire behavior with group torching, isolated torching and uphill runs. Numerous structures threatened. Area, road and trail closures in effect.

* East Canyon, Northwest Area, Utah DOF. Eight miles southwest of Henefer, UT. Grass, chaparral and brush. Extreme fire behavior with running, spotting and torching. Residence threatened. Evacuations and road closures in effect.

Birch, Salt Lake Field Office, BLM. Eighteen miles south of Oakley, ID. Brush and short grass. Minimal fire behavior with single tree torching.

Predictive Services Discussion: An upper-level trough over the West Coast will move northeast shifting the dry and windy conditions slightly to the east-southeast across the Intermountain West. Elevated to critical fire weather conditions are likely again across much of the Great Basin into the Southwest, West Slope, and central Wyoming. Isolated to scattered thunderstorms are likely from northern California through Oregon into the Northern Rockies with wetter storms and more widespread precipitation likely across northern Idaho and western Montana. Breezy conditions are also possible in parts of eastern North Dakota into northern Minnesota with continued well above average temperatures across the northern Plains and Great Lakes.

## Firefighter Nutrition

Firefighter Health \& First Aid

Nutrition is a critical part of the health and safety of wildland fire suppression personnel. This is the fuel for the body to perform the work and maintain cognitive abilities. Wildland firefighters on the fireline need 4,000 to 6,000 calories a day to avoid an energy deficit. Consider the following key points when choosing your meal:

- There are three major energy sources in food: carbohydrates, protein, and fats.
- Carbohydrates (also called sugar) offer an immediate source of energy for your body. They provide the fuel for your muscles and organs, such as your brain.
- Proteins are the basic building blocks of the human body. They are made up of amino acids that help build muscles, blood, skin, hair, nails, and internal organs.
- Fat is an essential nutrient that provides energy, energy storage, insulation, and contour to the body.
- National Technology and Development Program (NTDP) recommends eating 150 to 200 kcals every two hours during the work shift to maintain blood glucose and energy levels.
Carbohydrates:
- Studies on athletes have shown that carbohydrates are the most critical energy source for performance and health.
- Carbohydrates are your body's first choice for fuel. If given a choice of several types of foods simultaneously, your body will use the energy from carbohydrates first.
- If you do not eat enough carbohydrates, the following can occur:
- Fatigue.
- Muscle cramps.
- Poor mental function.
- Fire camp lunches are designed to allow firefighters small amounts of food (primarily carbohydrates) that can be easily eaten throughout the work shift.

## Discussion Points:

How are you eating your fire lunch? Is it all at once or in small amounts throughout the day? Think of long-duration events (ultra runs, triathlons). Do athletes stop for a big meal or eat small amounts constantly throughout the race?
