Southwest Area (PL 4)
New fires:
New large incidents:

## UNK

Uncontained large fires:
Type 1 IMTs committed:
Type 2 IMTs committed: 2

Telegraph, Tonto NF, USFS. IMT 1 (SW Team 2). Five mile southeast of Superior, AZ. Grass and brush. Moderate fire behavior. Numerous structures threatened. Evacuations and area closures in effect.

Slate, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Moderate fire behavior. Structures threatened.

Mescal, Gila District Office, BLM. IMT 2 (SW Team 5). Twelve miles northeast of Hayden, AZ. Grass, chaparral and brush. Minimal fire behavior with flanking, backing and smoldering. Several communities and numerous structures threatened. Evacuations, area and road closures in effect.

Thompson Canyon, Socorro District, New Mexico DOF. Fifteen miles west of Cliff, NM. Timber and brush. Moderate fire behavior with isolated and single tree torching.

* Pinnacle, Coronado NF, USFS. IMT 2 (SW Team 3) mobilizing. Twenty-eight miles northwest of Safford, AZ. Timber, grass and brush. Active fire behavior with running, spotting, flanking and backing.
* Shamrock, Coronado NF, USFS. Eleven miles northeast of Nogales, AZ. Grass and brush. Active fire behavior with running, backing and flanking.

Wolf Draw, Santa Fe NF, USFS. Eleven miles northwest of Regina, NM. Timber. No new information.
Johnson, Gila NF, USFS. Previously reported incident. Twenty miles north of Silver City, NM. Timber and grass. Moderate fire behavior with backing and creeping. Structures threatened. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

Predictive Services Discussion: An upper low will move from the northern Plains into south-central Canada with troughing over the Pacific Northwest and a building upper high over the Southwest and southern Plains. Dry and breezy conditions are likely over portions of the northern Plains and Intermountain West. Rain is likely along and west of the Cascades and across portions of the northern Plains into the Great Lakes with heavy rain possible in parts of the Mid-Atlantic. Well above average temperatures are likely to continue and expand across the Desert Southwest and southern Plains.

# In Country Not Seen in Daylight 

Operational Engagement Category

Often, firefighters arrive on a fire after dark, addressed by Watch Out Situation \#2. Before safely fighting fire in country not seen in daylight, firefighters must answer the following questions:

- Can the resources you are replacing give you a thorough briefing? Identify where you can get information. Can you meet up with the departing overhead/resource leaders?
- Can you observe the area or use scouts? List ways you could observe the work area.
- Have escape routes and safety zones been thoroughly scouted and marked for night use? Talk about what constitutes an escape route and a safety zone. Who would identify them and in what ways might they be marked?
- Have potential dangers been located? Can they be mitigated? What are the dangers associated with working in unfamiliar country in the dark? How can they be mitigated?
- Reduce the risks by:
- Posting lookouts.
- Checking communications.
- Retreating if you have doubts about your escape routes or safety zones or the situation becomes too complex.
- Give examples of arriving on a fire after dark and what was done to allow you to fight fire safely in country not seen in daylight.
- Identifying prominent geographic features.
