

**National Interagency Coordination Center
Incident Management Situation Report
Saturday, June 12, 2021– 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (61 fires)
New large incidents:	0
Large fires contained:	3
Uncontained large fires: ***	18
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	1
Type 2 IMTs committed:	6

Nationally, there are 7 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	5
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Telegraph, Tonto NF, USFS. IMT 1 (SW Team 2). Five mile southeast of Superior, AZ. Grass and brush. Active fire behavior with uphill runs, flanking and backing. Numerous structures threatened. Evacuations and area closures in effect.

Slate, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Extreme fire behavior with crowning and group torching. Structures threatened. Road closures in effect.

Pinnacle, Coronado NF, USFS. IMT 2 (SW Team 3). Twenty-eight miles northwest of Safford, AZ. Timber, grass and brush. Active fire behavior with running, spotting and flanking.

Shamrock, Coronado NF, USFS. Eleven miles northeast of Nogales, AZ. Grass and brush. Active fire behavior with running, backing and flanking.

Mescal, Gila District Office, BLM. IMT 2 (SW Team 5). Twelve miles northeast of Hayden, AZ. Grass, chaparral and brush. Minimal fire behavior with flanking, backing and smoldering. Several communities and numerous structures threatened. Area and road closures in effect.

Thompson Canyon, Socorro District, New Mexico DOF. Fifteen miles west of Cliff, NM. Timber and brush. Minimal fire behavior with single tree torching.

Wolf Draw, Santa Fe NF, USFS. Eleven miles northwest of Regina, NM. Timber. No new information. Last report unless new information is received.

Johnson, Gila NF, USFS. Twenty miles north of Silver City, NM. Timber and grass. Moderate fire behavior with flanking, backing and creeping. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

Great Basin Area (PL 3)

New fires: 5
New large incidents: 0
Uncontained large fires: 6
Type 2 IMTs committed: 3

Pack Creek, Manti-La Sal NF, USFS. IMT 2 (GB Team 4). Fourteen miles southeast of Moab, UT. Timber and brush. Extreme fire behavior with crowning, uphill runs and wind-driven runs. Residences threatened. Evacuations and road closures in effect.

Bear, Vernal Field Office, BLM. IMT 2 (CA Team 10). Three miles north of Helper, UT. Timber, grass and brush. Extreme fire behavior with single tree torching, group tree torching and wind-driven runs. Community of Helper, UT threatened. Structures, energy infrastructure and sage-grouse habitat threatened. Area and road closures in effect.

Bennion Creek, Manti-La Sal NF, USFS. Twenty-three miles northwest of Helper, UT. Brush, chaparral and timber. Active fire behavior with uphill runs, spotting and short crown runs. Structures and energy infrastructure threatened. Evacuations, area road and trail closures in effect.

Sandy Valley, Southern Nevada District, BLM. Ten miles southwest of Las Vegas, NV. Brush. Moderate fire behavior with single tree torching, group torching and smoldering.

Mammoth, Dixie NF, USFS. IMT 2 (GB Team 5). Twenty miles southwest of Panguitch, UT. Timber. Minimal fire behavior with smoldering. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

East Canyon, Northwest Area, Utah DOF. Seven miles east of Morgan, UT. Grass, chaparral and brush. Minimal fire behavior with smoldering.

Predictive Services Discussion: High pressure aloft will build over the Southwest and Intermountain West as deep low pressure develops off the West Coast. A few thunderstorms are likely over New Mexico and southern Colorado with showers in the Idaho Panhandle and western Montana. Showers will also occur across portions of the Great Lakes while heavy rain is possible in parts of the Mid-Atlantic and Southeast. Above average temperatures will occur across most of the country with much above normal values for the Desert Southwest and Intermountain West.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

Initial Attack Sizeup/Safety

Operational Engagement Category

Having a good sizeup is important to give both the Incident Commander (IC) and Fire Management Officer (FMO) a good idea of existing problems and what resources may be needed for effective firefighting.

Use the following reporting factors for sizeup and reference local fire sizeup cards. Discuss others that may be used.

- Fire name and location.
- Terrain (slope, aspect, elevation) and position of fire on the slope.
- Size of fire.
- Fuel type, anticipated control problems, and spread potential.
- Values threatened.
- Weather conditions (wind speed and direction).
- Fire behavior.
- Resources on the fire and those needed.
- Estimated containment and control times.
- Cause (known, suspected, under investigation).

After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.

- Have you sized up the fire and relayed the information to dispatch?
- Is the observed fire weather consistent with the forecast?
- Can you control the fire with the resources available (on the incident or en route) and under the expected conditions?
- Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas)? Have you communicated this information to all personnel assigned to the incident, including new arrivals?
- Are lookouts in place or can you see the whole fire area?
- Can you communicate with everyone on the fire and with dispatch?
- Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
- Are safety and the 10 Standard Firefighting Orders being followed and/or mitigated?
- Do you have a complete list of what resources have been ordered for the fire?
- Will you control the fire before the next operational period? If you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency FMO or Duty Officer (DO)?
