National Interagency Coordination Center Incident Management Situation Report Wednesday, June 16, 2021– 0730 MDT National Preparedness Level 3

National Fire Activity:

Initial attack activity:	Light (104 fires)
New large incidents:	11
Large fires contained:	4
Uncontained large fires: ***	25
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	2
Type 2 IMTs committed:	7

Nationally, there are 8 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

New fires:	8
New large incidents:	1
Uncontained large fires:	9
Type 1 IMTs committed:	1
Type 2 IMTs committed:	2

Telegraph, Tonto NF, USFS. IMT 1 (SW Team 2). Two miles southeast of Superior, AZ. Short grass, chaparral and brush. Active fire behavior with uphill runs, running and flanking. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Pinnacle, Coronado NF, USFS. IMT 2 (SW Team 3). Eighteen miles south of Bylas, AZ. Short grass, brush and timber. No new information.

Rincon, Sante Fe NF, USFS. IMT 2 (SW Team 4). Twenty-five miles northwest of Las Vegas, NM. Timber and brush. Moderate fire behavior with uphill runs, torching and spotting. Trail closures in effect.

Slate, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Active fire behavior with group torching, spotting and smoldering. Road closures in effect.

Cornville, Coconino NF, USFS. Two miles east of Cornville, AZ. Brush and chaparral. Minimal fire behavior with smoldering and single tree torching.

* **Winchester**, Southeast District, Arizona DOF. Twenty miles northeast of Benson, AZ. Short grass, brush and chaparral. Active fire behavior with uphill runs, wind-driven runs and isolated torching. Residences and energy infrastructure threatened.

Cemetery, Bernalillo District, New Mexico DOF. Two miles northeast of Bosque, NM. Timber, short grass and brush. Moderate fire behavior with isolated torching, creeping and smoldering.

Mescal, Gila District Office, BLM. Twelve miles northeast of Hayden, AZ. Grass and brush. Minimal fire behavior. Structures threatened. Area closures in effect.

Shamrock, Coronado NF, USFS. Eleven miles northeast of Nogales, AZ. Grass and brush. No new information.

Johnson, Gila NF, USFS. Twenty miles north of Silver City, NM. Timber and grass. Moderate fire behavior with flanking, backing and creeping. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

<u>Predictive Services Discussion:</u> High pressure aloft will be centered over the Four Corners bringing record heat to the Southwest and portions of the Great Basin and Colorado. For the remainder of the West temperatures will be above normal and extend into the western Great Lakes. Isolated dry thunderstorms are expected for the Southwest, southern Utah, western Colorado, and the eastern Sierra. Elevated fire weather conditions with gusty winds and low humidity are forecast for eastern Montana into northwest Minnesota. For Alaska, an active thunderstorm pattern begins with isolated to scattered thunderstorms expected for the interior as temperatures remain above normal.

http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm

Leadership Category

Operational tempo is the speed and intensity of our actions relative to the speed and intensity of unfolding events in the operational environment. Within this context, fire leaders plan, prepare, and execute operations proactively, rather than continuously being forced to react to the environment. Successfully maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when the operational tempo is changing, especially when it changes quickly. Maintaining good situation awareness in spite of change in operational tempo represents a considerable challenge.

The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary planning and resource adjustments.

Discussion Points:

- How do you maintain situational awareness in different operational tempos?
- When do you see this occurring most?
- Give an example of when you experienced changes in operational tempo that resulted in you feeling uncomfortable.
