# National Interagency Coordination Center <br> Incident Management Situation Report 

Friday, June 18, 2021- 0730 MDT
National Preparedness Level 3

## National Fire Activity:

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (164 fires)
3
2
25
0
0
2
7

Nationally, there are 9 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

*1 Hectare $=2.47$ Acres
Predictive Services Discussion: Westerly flow aloft will continue across the Pacific Northwest and Northern Rockies with high pressure over southern half of the Intermountain West. Isolated to scattered dry thunderstorms are likely across portions of the Southwest and Great Basin into Colorado with isolated dry thunderstorms possible in the Sierra and southeast California. Hot and dry conditions will continue across the southern half of the Intermountain West and stretching through California into portions of the inland Pacific Northwest. Postfrontal dry and windy conditions are expected from the northern Plains through Minnesota into the western Great Lakes. Heavy rain will spread from the Alabama Gulf Coast to Galveston with severe weather likely from southern lowa through western Pennsylvania.

# No Communication Link with Crewmembers or Supervisor <br> Fire Communication Category 

Watch Out Situation \#7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communication(s) be established?
- Talk about how communications are set up on fires, including the variables that must be considered.
- Review situations where communications were a problem. Discuss what was done to fix the problem.
- Ask yourself, "Do we need a repeater setup or can an experienced firefighter act as a human repeater?"
- Is the communication triangle complete?
- Review the communication triangle: speaker, message, and audience. Discuss where it comes up in the 10 Standard Fire Orders and the 18 Watch Out Situations.
- Discuss ways that firefighters can maintain the communication triangle on the fireline.
- How can we reduce the risks?
- If the situation is complex, wait until communications are in place.
- Talk about the fires where crews had to leave the line, did not go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications in these situations.
- Discuss scenarios in which communications could be disrupted. What are some possible solutions?
