# National Interagency Coordination Center <br> Incident Management Situation Report <br> Sunday, June 20, 2021- 0730 MDT <br> National Preparedness Level 3 

## National Fire Activity:

Initial attack activity:
New large incidents:
Large fires contained:
Light (160 fires)
5
1.

Uncontained large fires: *** 3

Area Command teams committed: 0
NIMOs committed: 0
Type 1 IMTs committed: 2

Type 2 IMTs committed:
Nationally, there are 10 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)
New fires: 9
New large incidents: 1
Uncontained large fires: 7
Type 1 IMTs committed: 1
Type 2 IMTs committed: 3
Backbone, Coconino NF, USFS. IMT 1 (SW Team 1). Eleven miles west of Pine, AZ. Brush and timber. Extreme fire behavior with short crown runs, wind-driven runs and long range spotting. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Telegraph, Tonto NF, USFS. IMT 2 (NW Team 6). Two miles southeast of Superior, AZ. Short grass, chaparral and brush. Moderate fire behavior with flanking, backing and group torching. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

Pinnacle, Coronado NF, USFS. IMT 2 (SW Team 3). Eighteen miles south of Bylas, AZ. Short grass, brush and timber. Active fire behavior with wind-driven runs, running and spotting. Residences threatened. Evacuations, area, road and trail closures in effect.

Horton, Apache-Sitgreaves NF, USFS. Five miles north of Hannigan, AZ. Timber and heavy slash. Active fire behavior with uphill runs, flanking and backing. Area closures in effect.

Rincon, Sante Fe NF, USFS. IMT 2 (SW Team 4). Twenty-five miles northwest of Las Vegas, NM. Timber and brush. Minimal fire behavior with creeping and smoldering. Area and trail closures in effect.

* Wyrick, Apache-Sitgreaves NF, USFS. Seven miles northwest of Heber, AZ. Timber litter and short grass. Active fire behavior with long range spotting, wind-driven runs and group torching. Energy infrastructure threatened.

Slate, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Minimal fire behavior with smoldering.

Johnson, Gila NF, USFS. Previously reported incident. Twenty miles north of Silver City, NM. Timber and grass. Moderate fire behavior with flanking, backing and creeping. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

Predictive Services Discussion: As an upper-level shortwave trough moves into the northern Rockies and Plains, an upper-level ridge will build from the Desert Southwest into the Pacific Northwest. Showers and thunderstorms are expected along and east of the Continental Divide in Montana and Wyoming with much cooler temperatures and higher RH as well. Precipitation is possible overnight along the Front Range as the cold front slides south and east across the Plains and towards the Continental Divide in Colorado. Widespread rainfall is likely in the Upper Midwest and Great Lakes. Elevated to critical fire weather conditions are likely across Utah, southern Wyoming, western Colorado, and portions of the Desert Southwest as westerly winds strengthen ahead of the cold front. Very hot and dry conditions are likely from the Desert Southwest through the West Coast. Isolated thunderstorms remain possible from southeast Arizona across New Mexico and into the Colorado Rockies.

Lookouts (LCES)<br>Operational Engagement Category

Lookouts are often best situated to notice the cumulative changes of fire behavior.
Standard Firefighting Order \#5 is: Post lookouts when there is possible danger.

- Discuss why lookouts should be posted at all times.

What are you looking for when you are selecting a lookout location?

- Choose a good vantage point, preferably with a good overview of the entire area where firefighters are located, including escape routes and safety zones.
- Never rely exclusively on aircraft as your lookout.

What are the desired qualities, capabilities, knowledge, and responsibilities of a lookout?

- Experienced firefighter.
- Solid knowledge of fire behavior and the ability to recognize and monitor other environmental hazards.
- Knowledge of crew locations, escape and safety locations, and trigger points.
- Good communicator.
- Knowledge of weather patterns, and signs of incoming weather changes.
- Advises the crew of fire behavior changes, and tracks weather trends and relays the information.
- Monitors and accounts for all individuals within the assigned area at all times, and notifies others if breaks are needed.

What is the necessary equipment for a lookout?

- Personal protective equipment (PPE), radio with extra batteries, compass, binoculars, belt weather kit, an Incident Action Plan (IAP), map, food, water, and watch.
