# National Interagency Coordination Center <br> Incident Management Situation Report <br> Thursday, June 24, 2021- 0730 MDT <br> National Preparedness Level 4 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Light (133 fires)
4

Area Command teams committed: 0
41

NIMOs committed: 0
Type 1 IMTs committed: 5
Type 2 IMTs committed: 12
Nationally, there are 11 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

## Southwest Area (PL 5)

| New fires: | 7 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 10 |
| Type 1 IMTs committed: | 2 |
| Type 2 IMTs committed: | 3 |

Rafael, Prescott NF, USFS. IMT 1 (SW Team 2). Three miles northeast of Perkinsville, AZ. Brush, short grass and timber. Extreme fire behavior with wind-driven runs, long-range spotting and flanking. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Wyrick, Apache-Sitgreaves NF, USFS. IMT 2 (SW Team 5). IMT is also managing the West Chev incident. Two miles northwest of Heber, AZ. Timber and short grass. Moderate fire behavior with flanking, backing and single tree torching. Community of Heber-Overgaard, numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

West Chev, Apache-Sitgreaves NF, USFS. Thirteen miles northwest of Heber, AZ. Timber and short grass. Moderate fire behavior with flanking, backing and isolated torching. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Backbone, Coconino NF, USFS. IMT 1 (SW Team 1). Eleven miles west of Pine, AZ. Short grass and brush. Minimal fire behavior with backing, creeping and smoldering. Numerous structures and energy infrastructure threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Walnut, Southeast District, Arizona DOF. Fourteen miles northeast of Benson, AZ. Short grass, brush and chaparral. Moderate fire behavior with flanking, backing and creeping. Structures and infrastructure threatened. Precipitation occurred over the fire area yesterday. Last narrative report unless significant activity occurs.

Horton, Apache-Sitgreaves NF, USFS. Five miles north of Hannigan, AZ. Timber and heavy slash. Active fire behavior with uphill runs, flanking and backing. Residences threatened. Area closures in effect.

Telegraph, Tonto NF, USFS. IMT 2 (NW Team 6). Two miles southeast of Superior, AZ. Short grass and brush. Moderate fire behavior with flanking, backing and creeping. Numerous residences and energy infrastructure threatened. Evacuations, area, and trail closures in effect.

Pinnacle, Coronado NF, USFS. IMT 2 (SW Team 3). Thirteen miles south of Bylas, AZ. Short grass, brush and timber. Moderate fire behavior with flanking, backing and creeping. Structures threatened. Evacuations, area, road and trail closures in effect.

Alamo, Coronado NF, USFS. Ten miles west of Nogales, AZ. Short grass and brush. Minimal fire behavior with backing and flanking. Structures threatened.

Rock Butte, Prescott NF, USFS. Three miles northwest of Drake, AZ. Short grass and brush. Moderate fire behavior with backing, creeping and smoldering. Area closures in effect.

Slate, Coconino NF, USFS. Twenty-three miles northwest of Flagstaff, AZ. Chaparral and timber. Minimal fire behavior with smoldering.

Rincon, Sante Fe NF, USFS. Twenty-five miles northwest of Las Vegas, NM. Timber and brush. No new information. Last report unless new information is received.

*1 Hectare $=2.47$ Acres
Predictive Services Discussion: An upper low will remain off the California Coast with light southwest flow aloft over the Intermountain West. Moisture will remain over much of the West with mixed wet and dry thunderstorms from the Southwest to the Northern Rockies, Great Basin, northern California, and extreme southern Oregon. The greatest concentration of dry thunderstorms will be over northern California into central Nevada. Temperatures will be above normal for the Northern Rockies and Northwest while the Great Basin, Rocky Mountains, and Southwest are near to a little below normal. Alaska will see south flow aloft with above normal temperatures over the interior and strong winds and low relative humidity likely north of the Alaska Range.

## Spot Weather Forecast

Weather - Fire Behavior Category

Spot weather forecasts should be requested or submitted online for those fires that have potential for extreme fire behavior, exceed initial attack, or are located in areas where Red Flag Warnings have been issued.

Basic elements needed for a spot weather forecast include:

- Location by street address/zip code/city name, latitude/longitude, or US National Grid, or drag to a location using the spot weather forecast request webpage https://www.weather.gov/spot/.
- Type of incident (wildfire, prescribed burn, hazardous materials, search and rescue).
- Project/incident name.
- Requesting agency/official, email address, and phone number.
- Elevation (at top and bottom of incident).
- Drainage name, size, aspect, fuel type, and sheltering (full, partial, unsheltered).
- Forecast delivery time (i.e., as soon as possible or a later time), time forecast should start, and time zone.
- Any remarks that can help meteorologists forecast the site, pertinent feedback information (i.e., humidity values were lower than predicted), or special requests (i.e., very interested in potential wind shifts).

Activity: Calibrate your handheld fire weather meter and review belt weather kit use.
