Predictive Services Discussion: High pressure over the inland Pacific Northwest will continue the heat wave over the Northwest, Northern Rockies, northern Great Basin, and northern California. High temperatures are forecast to reach 100 to 115 in the valleys with widespread $90+$ degree readings in the mountains. RH will be very low during the afternoon with minima in the single digits and teens. Mid-level moisture on the leading edge of the monsoon will bring a threat of isolated dry thunderstorms to the northern Great Basin, northern California, and eastern Oregon. With a very dry airmass in place at the surface, strong wind gusts over 50 mph will be possible with the thunderstorms. Farther south, scattered thunderstorms over southern California, the southern Great Basin, Southwest, and Colorado will bring wetting rains. The heaviest rainfall potential is over the Southwest with debris flows possible over recent burn scars.

## June 30, 2021 - Day 1 Learning from our History

Today is the eighth anniversary of a single shift on the Yarnell Hill Fire that took the lives of 19 firefighters (https://www.wildfirelessons.net/orphans/viewincident?DocumentKey=1a2dac92-1d79-420f-be0e-
1aa616a40a70). We use this solemn day to remember that instance and begin a week of reflection to honor all our sisters and brothers who have perished in the line of duty. We honor through learning.

Each day of the Week of Remembrance builds upon the previous day. We encourage you to give this Week of Remembrance the time and attention it deserves, and that will likely take more than 6 minutes each day. It's worth it!

In this year's Week of Remembrance, we acknowledge the twentieth anniversary of the Thirtymile Fire. Lessons learned from the Thirtymile Fire range from the individual and crew level to changes that impacted the entire wildland fire service.

As we review the events leading to the entrapment and shelter deployments at Thirtymile, we will start by considering the first three Wildland Fire Leadership Levels - Follower, New Leader, and Leader of People - to aid our learning (https://www.nwcg.gov/committees/leadership-committee/leadership-levels). The Leadership Levels illustrate the standard leadership skills and knowledge needed at various levels of the organization. We will then review the events immediately following the entrapment and discuss group dynamics and taking care of ourselves and others after traumatic events.

Let's begin! Consider how we learn from past incidents and the experiences of others.

## Discussion Questions

Within your crew, team, or group, discuss what a learning organization means to you.
\& How can you best learn from past fire events and the experiences of others?
$\&$ As you gain more experience, how can that change how you view, interpret, and learn from incidents like Thirtymile?
2 How do you contribute to the learning of others?
$\&$ What have you learned from Thirtymile already?
In preparation for the week ahead, take time to:
$\checkmark$ Review the report and other documents at the Wildland Fire Lessons Learned Center, https://www.wildfirelessons.net/viewdocument/thirtymile-fire-fata.
$\checkmark$ Watch the Thirtymile Fire Case Study (2012) video, https://youtu.be/KK4SjPqYor4 (20 minutes).

Additional video content from Learning from the Thirtymile Fire (2018) video, https://youtu.be/4NFbBC2oqR0, is provided daily to support your ongoing discussions this week as we focus on learning from Thirtymile and listen to those who were there tell their stories.

[^0]:    * Blue, Sierra NF, USFS. Five miles southeast of Shaver Lake, CA. Timber and chaparral. Active fire behavior with short-range spotting, flanking and backing. Residences threatened. Evacuations, area and road closures in effect.
