

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, July 1, 2021– 0730 MDT  
National Preparedness Level 4**

**National Fire Activity:**

Initial attack activity:	Light (141 fires)
New large incidents:	3
Large fires contained:	6
Uncontained large fires: ***	32
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	7

Nationally, there are 12 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### **Southwest Area (PL 3)**

New fires:	15
New large incidents:	0
Uncontained large fires:	10
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

**Bottom**, San Carlos Agency, BIA. IMT 2 (SW Team 4). Seven miles west of Bylas, AZ. Brush and tall grass. Active fire behavior with backing. Structures and infrastructure threatened. Road closures in effect.

**Horton**, Apache-Sitgreaves NF, USFS. Five miles north of Hannigan, AZ. Timber and heavy slash. Minimal fire behavior with smoldering and creeping. Area closures in effect. Precipitation occurred over the fire area yesterday.

**Rafael**, Prescott NF, USFS. Transfer of command from IMT 1 (SW Team 2) back to the local unit will occur tomorrow. Three miles northeast of Perkinsville, AZ. Brush, short grass and timber. Minimal fire behavior with creeping and smoldering. Structures and infrastructure threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Backbone**, Coconino NF, USFS. Transfer of command from IMT 1 (SW Team 1) back to the local unit will occur today. Eleven miles west of Pine, AZ. Short grass and brush. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Wyrick**, Apache-Sitgreaves NF, USFS. Two miles northwest of Heber, AZ. Timber and short grass. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

**West Chev**, Apache-Sitgreaves NF, USFS. Thirteen miles northwest of Heber, AZ. Timber and short grass. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Telegraph**, Tonto NF, USFS. Transfer of command from IMT 2 (NW Team 6) back to the local unit occurred yesterday. Two miles southeast of Superior, AZ. Short grass and brush. Minimal fire behavior with creeping and smoldering. Numerous residences and energy infrastructure threatened. Area and trail closures in effect.

**Water Springs**, Colorado River District, BLM. Thirty-one miles northeast of Dolan Springs, AZ. Brush and tall grass. Minimal fire behavior with creeping and smoldering.

**Planet Ranch**, Bill Williams National Wildlife Refuge, FWS. Twenty miles southeast of Lake Havasu City, AZ. Chaparral and brush. Minimal fire behavior with creeping and smoldering.

**Pinnacle**, Coronado NF, USFS. Thirteen miles south of Bylas, AZ. Short grass, brush and timber. Minimal fire behavior. Structures threatened. Area, road and trail closures in effect.

**Predictive Services Discussion:** The upper ridge over the Northern Rockies will weaken today, but hot, above normal temperatures will continue for northern California, the northern Great Basin, Northwest, and Northern Rockies. Monsoon moisture will continue to move north today with thunderstorms forecast for much of the western U.S. Isolated to scattered mixed wet and dry thunderstorms are likely for northern California, eastern Oregon, the northern Great Basin, and Northern Rockies. Farther south, scattered thunderstorms with wetting rain are forecast for the southern Great Basin, Colorado, Wyoming, and the Southwest. Elevated to locally critical conditions are likely in eastern Montana due to southeast winds ahead of a thermal trough. The interior of Alaska will warm today with highs in the 80s and minimum RH in the 20s while a cold front moves through the Ohio Valley and Mid-Atlantic with widespread rain.

## July 1, 2021 – Day 2 Leadership Level 1, Follower (Provide Action)

*Followers have several responsibilities: to become competent in basic job skills, take initiative, learn from others, ask questions, and develop communication skills.*

Key elements related to operating at the Follower Level:

- ⚡ Followership begins the journey of becoming a Student of Fire.
- ⚡ Part of being a leader is exercising good followership and understanding human dynamics. <https://www.youtube.com/watch?v=lmyZMtPVodo>. For more information on human dynamics refer to pages 46-49 of *Leading in the Wildland Fire Service*, PMS 494-2.
- ⚡ Ask questions to increase individual knowledge and improve the safety of self and team members.
- ⚡ Have a knowledge of the elements of Human Factor Barriers to Situation Awareness (*Incident Response Pocket Guide (IRPG)*, PMS 461, white section) to understand how human elements can contribute to team performance and fireline safety.

Who in your crew, team, or group is currently at Leadership Level 1?

### **Thirtymile Fire – July 9, 2001, Initial Attack**

(Watch *Learning from the Thirtymile Fire* video <https://youtu.be/4NFbBC2oqR0>, from start to 25:00 minutes)

At 2126 hours on July 9, 2001, a fire is reported near the road along the Chewuch River. The fire is about five acres with two spots ahead of it. An engine with three firefighters arrives just after 2300. One engine arrives just before midnight, and an Interagency Hotshot Crew (IHC) arrives at 0100 hours. By 0530 on July 10<sup>th</sup> there are seven spots covering about five to six acres. Two spots are approximately one acre each.

After getting the call to respond to a fire around midnight, a regular Type 2 Crew formed up into two utility vans and a pickup truck. Around 0300, they began the three-hour drive to the incident. At 0700, the crew is briefed at a ranger station prior to heading to the fire and is informed that they will be doing mop-up. They arrive at the fire at 0900. The assigned IHC leaves the fire for rest at 1100. Mid-morning, fire intensity increases with more frequent torching and increasingly longer spotting distances. By about noon, the crew is experiencing difficulties with the pumps and multiple broken hand tools. Just after noon, the Incident Commander (IC) requests additional resources, including a helicopter.

### **Discussion Questions**

Use events described above and your experience to answer:

- ⚡ What does Student of Fire mean to you? Why is it important to be one?
- ⚡ Why do followers need to understand human dynamics?
- ⚡ What are some examples of human factors that affect decision-making and team performance and can be barriers to situational awareness? How can you account for these human factors and improve your performance?
