## National Interagency Coordination Center Incident Management Situation Report

Friday, July 2, 2021- 0730 MDT
National Preparedness Level 4

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (167 fires)
8
4
33
0
0
4
6

Nationally, there are 14 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.

## Link to Geographic Area daily reports.

Link to Understanding the IMSR.

One MAFFS C-130 airtanker and support personnel each from the $152^{\text {nd }}$ Airlift Wing (Nevada Air National Guard) and the $146^{\text {th }}$ Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

## Southwest Area (PL 3)

| New fires: | 6 |
| :--- | :---: |
| New large incidents: | 4 |
| Uncontained large fires: | 10 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 1 |

Bottom, San Carlos Agency, BIA. IMT 2 (SW Team 4). Seven miles west of Bylas, AZ. Brush and tall grass. Moderate fire behavior with running, backing and spotting. Structures and infrastructure threatened. Road closures in effect. Precipitation occurred over the fire area yesterday.

Horton, Apache-Sitgreaves NF, USFS. Five miles north of Hannigan, AZ. Timber and heavy slash. Minimal fire behavior with smoldering and creeping. Area closures in effect.

Rafael, Prescott NF, USFS. Transfer of command from IMT 1 (SW Team 2) back to the local unit will occur today. Three miles northeast of Perkinsville, AZ. Brush, short grass and timber. Minimal fire behavior with creeping and smoldering. Structures and infrastructure threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Reduction in acreage due to more accurate mapping.

[^0]Backbone, Coconino NF, USFS. Eleven miles west of Pine, AZ. Short grass and brush. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Wyrick, Apache-Sitgreaves NF, USFS. Two miles northwest of Heber, AZ. Timber and short grass. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Telegraph, Tonto NF, USFS. Two miles southeast of Superior, AZ. Short grass and brush. Minimal fire behavior. Numerous residences and energy infrastructure threatened. Area and trail closures in effect. Precipitation occurred over the fire area yesterday.

Planet Ranch, Bill Williams National Wildlife Refuge, FWS. Twenty miles southeast of Lake Havasu City, AZ. Chaparral and brush. Minimal fire behavior with creeping and smoldering.

Pinnacle, Coronado NF, USFS. Thirteen miles south of Bylas, AZ. Short grass, brush and timber. Minimal fire behavior. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

* Painted, Tonto NF, USFS. Thirteen miles northeast of Apache Junction, AZ. Short grass and brush. Moderate fire behavior. Last narrative report unless significant activity occurs.
* Middle, Tonto NF, USFS. Fifty miles northeast of Scottsdale, AZ. Short grass and brush. Moderate fire behavior. Residences and energy infrastructure threatened. Area closures in effect. Last narrative report unless significant activity occurs.
* Midway, Tonto NF, USFS. Thirty-five miles northeast of Scottsdale, AZ. Short grass and brush. Moderate fire behavior. Last narrative report unless significant activity occurs.

Water Springs, Colorado River District, BLM. Thirty-one miles northeast of Dolan Springs, AZ. Brush and tall grass. No new information.

Predictive Services Discussion: Above normal temperatures continue for the inland Northwest, Northern Rockies, northern Great Basin, and Wyoming under a weakening upper ridge. Drier southwest flow aloft will begin across the west today, but enough moisture will remain for isolated to scattered mixed wet and dry thunderstorms for northeast California, eastern Oregon, the Great Basin, Northern Rockies and Rocky Mountains. For the Southwest, deeper monsoon moisture will be in place for scattered thunderstorms with wetting rain. Elevated fire weather conditions are possible across eastern Montana, eastern Wyoming, and western South Dakota due to breezy southeast winds. Alaska is forecast to see very warm temperatures in the 80s for the central and eastern Interior with minimum RH in the 20s with locally critical winds north of the Alaska Range. A stalling cold front will bring the threat of heavy rain and potential flooding to much of the Southeast.

July 2, 2021 - Day 3 Leadership Level 2, New Leader (Convey Intent)

A New Leader begins transitioning from a follower to a leader of small groups to achieve a common goal. They begin to implement team cohesion, accept responsibility for self and team, and apply effective communications.

Key elements related to operating at the New Leader level:
$\&$ Leads by example.
2 Promotes inclusion for new and existing team members to build team cohesion, https://www.nwcg.gov/committee/6mfs/building-the-team, and create an environment for effective communication, https://www.nwcg.gov/publications/training-courses/rt-130/leadership/ld610.
2 Solicits questions, both up and down chain of command, in order to learn from others.
2 Applies a risk management process, https://www.nwcg.gov/publications/training-courses/rt130/operations/op818, to ensure safety of self and team members. Reference the Incident Response Pocket Guide (IRPG), PMS 461, httpw://www.nwcg.gov/publications/461, green section.
Who in your group is currently at Leadership Level 2?

## Thirtymile Fire - The Morning of July 10 ${ }^{\text {th }}$

(Watch Learning from the Thirtymile Fire video https://youtu.be/4NFbBC2oqR0, from 25:00 to 57:12 minutes)
As the Interagency Hotshot Crew (IHC) tries to get some rest, a crew member from the Type 2 Crew wakes the IHC Superintendent to request help. The IHC returns to the fire around 1400 with less than three hours of rest. At 1500 the Incident Commander (IC) accepted that they had lost the fire and pulled his crew back to the safety zone, also called the lunch spot.

At approximately 1530, two local engines arrived and engaged in their assignment from dispatch to keep the fire east of the road. They did not check-in with the IC or get a briefing. The engines began working small spots on the west side of the road and requested more people through the IC. One squad from the Type 2 Crew was dropped off on foot while the other drove one of the vans. The IHC Superintendent and Assistant scouted to the end of the road and noted three private vehicles at a campground before returning to the heel of the fire. The fire behavior escalated very quickly, and everyone was ordered back to the safety zone.

As nine crewmembers from the two squads loaded into the van, another four crewmembers ran down the road. After passing the people on foot, the van encountered fire across the road. With their escape route compromised, they turned around, and picked up the four people on foot before continuing up the road looking for safety.

## Discussion Questions

Use events described above and your experience to answer:

2 In what ways can we lead by example? How does this affect morale, team buy-in, and task accomplishment? How does leading by example change as you move through the Levels of Leadership?
2 How does a New Leader build cohesion?
2 How does a New Leader apply the Risk Management Process? At Thirtymile, the risk management decision was made to pull back and let the fire do what it was going to do. For firefighters with a bias toward action, it can be hard to sit back and do nothing. It's easy to drift back into doing something. How can the New Leader resist this urge? How can time spent not actively engaging the fire be spent productively?
2 How can Followers (Leadership Level 1) contribute to the development of a New Leader?

[^0]:    * Tiger, Prescott NF, USFS. Eleven miles east of Crown King, AZ. Tall grass and brush. Moderate fire behavior with wind-driven runs, uphill runs and backing. Area closures in effect.

[^1]:    * Ranch, Custer County. Started on private land 35 miles south of Miles City, MT. Short grass, brush and timber. Moderate fire behavior with backing, smoldering and wind-driven runs.
