Predictive Services Discussion: The high aloft over southern Nevada will weaken today, but above normal temperatures will continue over most of the Intermountain West with low afternoon RH. A weak upper trough will move through the Northern Rockies and bring isolated dry thunderstorms across northern Idaho into western Montana this morning. The thunderstorms will progress through Montana and into Wyoming during the day gradually becoming wetter with some storms approaching severe limits. Elevated to locally critical fire weather conditions are forecast across the Northern Great Basin into Wyoming and northwest Colorado with westerly winds coinciding with low RH. Moisture from the monsoon will continue across southeastern California, southern Great Basin, Wyoming, Colorado, and the Southwest with scattered thunderstorms, most of which will have wetting rain. Alaska will remain warm and dry today over the Interior with some breezy west winds. Strong to severe thunderstorms are forecast for the eastern Great Lakes and Mid-Atlantic.

Operational Briefings

Fire Communications Category

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the inside back cover of the [Incident Response Pocket Guide \(IRPG\), PMS 461](#):

- Situation:
 - Fire name, location, map orientation, other incidents in the area
 - Terrain influences
 - Fuel type and conditions
 - Fire weather (previous, current, and expected)
 - Winds, relative humidity (RH), temperatures, etc.
 - Fire behavior (previous, current, and expected): Time of day, alignment of slope and wind, etc.

- Mission/Execution:
 - Command: Incident Commander (IC)/immediate supervisor)
 - Leader's intent: Overall objectives/strategy
 - Specific tactical assignments
 - Contingency plans
 - Medevac plan: Personnel, equipment, transport options, contingency plans

- Communications:
 - Communication Plan: tactical, command, air-to-ground frequencies, cell phone numbers, etc.

- Service/Support:
 - Other resources: working adjacent and those available to order
 - Aviation operations
 - Logistics: Transportation, supplies and equipment

- Risk Management:
 - Identify known hazards and risks
 - Identify control measures to mitigate hazards /reduce risk
 - Include LCES
 - Identify trigger points for reevaluating operations

- Questions or Concerns?
