Predictive Services Discussion: High pressure aloft will continue to strengthen off the West Coast as upper troughing moves into the northern Plains and western Great Lakes. High pressure aloft will also strengthen over the Four Corners with increasing monsoon moisture for the Southwest. A cold front will move through eastern Montana into the northern Plains with elevated to locally critical conditions in eastern Montana and Wyoming into the Dakotas where west to northwest winds will gust to 35 mph amid relative humidity of 10-20%. The West Coast will continue to warm with temperatures rising to 10 to 15 degrees above normal with dry conditions across much of the West outside the Southwest. Isolated mixed wet and dry thunderstorms are forecast for portions of the southern Great Basin, southwest Colorado, and southeast California on the leading edge of the moisture. Severe weather is expected across the Midwest and Great Lakes.

Uninformed on Strategy, Tactics, or Hazards

Operational Engagement

Firefighters who are uninformed on strategy, tactics, or hazards are in conflict with Watch Out Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics, or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics, or hazards?
 - Discuss ways you might establish communications.
 - For example: Contact someone who is already on the fire and ask them what tactics and strategies are working or not working, what hazards have they witnessed, etc.
- Can scouting safely identify potential hazards?
 - Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane).
 - Discuss what types of hazards you might come across and ways you would mitigate them.
 - For example: If you arrive at a fire after dark and are instructed to dig line downhill with the fire below, how could you make this a safe situation?
- Have strategies, tactics, or hazards changed since last informed?
 - Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.).
 - Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.).
- Can you get a briefing from your supervisor?
 - Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics.
 - For example, if one crew decides to do a burnout but doesn't let the crew at the other end of the line know what they are doing, what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are better informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information.
 - Emphasize ways to inform firefighters about strategies, tactics, and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
 - Use the [Incident Response Pocket Guide \(IRPG\), PMS 461](#), (back inside cover) Briefing Checklist.
