Predictive Services Discussion: Remnants of Tropical Storm Kevin will merge with a weak upper low off the California Coast while upper-level ridging shifts over the West with the upper high in the central Great Basin. Very hot, dry, and unstable conditions will continue from northern California through the Northwest, northern Great Basin, and Northern Rockies. Relative humidity will continue to be low during the day with poor recovery tonight. Plume-dominated wildfire behavior is possible on active large fires in northern California, the Northwest, and northern Nevada into central Idaho and southwest Montana. Dry and breezy conditions are likely to continue across parts of North Dakota and Minnesota. Isolated to scattered mixed wet/dry thunderstorms are expected in northern California, southern and central Oregon, and northern Nevada. Tonight, high-based showers are likely with isolated thunderstorms in northwest California and western Oregon as the upper low off the coast moves north. Monsoonal thunderstorms are expected to continue across much of the Southwest and into portions of the southern Great Basin and Colorado Rockies.

Base All Actions On Current And Expected Fire Behavior

Weather – Fire Behavior Category

Discussion Points:

- Can you observe the area or use scouts? What information are the scouts looking for?
- Have escape routes and safety zones been thoroughly scouted? List some ways your crew will scout out an area before you begin working.
- Are escape routes and safety zones marked for night use? How do you adjust marking safety zones and escape routes for night use?
- Have potential dangers been located and can they be dealt with? List some dangerous fire behavior you may encounter and how you would deal with it.
- Do you have access to weather and fire behavior forecasts? What is your unit's procedure for obtaining forecasts?
- Can the resources you are replacing give you a thorough briefing? What information will you want to get from these resources?
- To reduce risk, initiate the following:
 - Post lookouts.
 - Check communications.
 - Retreat if you have doubts about your escape routes or safety zones, or if the situation becomes too complex. Discuss fires where you have adjusted your actions based on current and expected fire behavior.

How would you judge the fire season? (Above normal, below normal, or average.)
