**Predictive Services Discussion:** Upper-level troughing will remain over the Northwest and Northern Rockies with a cold front sliding southeast into northern California and the northern Great Basin. Upper-level ridging will remain over much of the eastern US extending westward through the central and southern Plains into the Southwest. Temperatures will remain cool across the Northwest and Northern Rockies into the northern Plains, while above normal temperatures continue for the eastern US, central and southern Plains, and Southwest. Breezy and dry conditions are forecast for the inland Northwest, much of the Great Basin, and central Rockies into the adjacent High Plains. Poor overnight relative humidity recovery will continue for the Sierra. Scattered mostly wet thunderstorms are forecast across the broader Four Corners region with isolated thunderstorms in western Montana. Showers are also expected in western Washington. Strong to severe thunderstorms are forecast for portions of the northern Plains into the Midwest with heavy rain and flooding possible from eastern South Dakota into southern Minnesota, Wisconsin, and northern Iowa.

# LEAD Time

## *Adaptability/Flexibility during High-Tempo Periods*

*Leadership Category*

The success of a firefighter's mission depends upon the crew's ability to alter behavior and dynamically manage resources to meet situational demands.

Adaptability/flexibility allows firefighters to alter a course of action based on new information, maintain constructive behavior under pressure and adapt to internal (body) and external (e.g., fire behavior, new assignment and crew experience levels) changes that occur on the fire ground.

What can make a firefighter successful at adapting or flexing?

- Recognize and acknowledge change.
- Anticipate problems by utilizing the risk management assessment in the Incident Response Pocket Guide (IRPG).
- Determine if a standard operating procedure (SOP) is appropriate.
- Interact constructively with others.
- Maintain the even strain—know those that can't.

While setting the tone for adaptability/flexibility it is important to establish an open, professional atmosphere that ensures a reporting culture. Utilizing leader's intent and the IRPG briefing guide ensure the crew understands the task, project or mission that needs to be accomplished. The most important tool to utilize while utilizing adaptability/flexibility is good two-way communication.

### **Discussion Points**

- How would you establish adaptability/flexibility within your station, crew or squad?
- Discuss a situation or fire behavior scenario where a typical response did not meet the needs and had to adapt or flex to accomplish the mission?
- When would it be important to become adaptable/flexible during an assignment?
