# National Interagency Coordination Center Incident Management Situation Report Wednesday, September 1, 2021 - 0730 MDT National Preparedness Level 5 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Light (83 fires)

Ungen 1
Uncontained large fires: *** 64
NIMOs committed: 3
Type 1 IMTs committed: 12
Type 2 IMTs committed: 19
Nationally, there are 50 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
One MAFFS C-130 airtanker and support personnel each from the $152^{\text {nd }}$ Airlift Wing (Nevada Air National Guard), three MAFFS from the $302^{\text {nd }}$ Airlift Wing (Colorado Air Force Reserve), two MAFFS from the $153^{\text {rd }}$ Airlift Wing (Wyoming Air National Guard) and two from the $146{ }^{\text {th }}$ Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the $141^{\text {st }}$ Air Refueling Wing (Washington Air National Guard) have been deployed to Fairchild, WA. One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the $162^{\text {nd }}$ Operations Group (Arizona Air National Guard) have been deployed to Eugene, OR in support of wildland fire operations. Also supporting these aircraft are eight ground controllers from multiple U.S. Air National Guard squadrons.

One Boeing 737 airtanker from New South Wales, Australia is supporting fire suppression efforts in the western United States.

## Northern California Area (PL 5)

| New fires: | 22 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 10 |
| NIMOs committed: | 2 |
| Type 1 IMTs committed: | 7 |
| Type 2 IMTs committed: | 3 |

Caldor, Eldorado NF, USFS. Unified command between NIMO (Team 2), IMT 1 (Cal Fire Team 6) and IMT 1 (CA Team 4). Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Active fire behavior with long-range spotting, group torching and crowning. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Dixie, Butte Unit, Cal Fire. IMT 1 (Cal Fire Team 1) and IMT 1 (GB Team 1). Fifteen miles northeast of Paradise, CA. Timber, light slash and brush. Extreme fire behavior with wind-driven runs, group torching and long-range spotting. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Monument, Shasta-Trinity NF, USFS. Unified command between IMT 1 (Cal Fire Team 5) and IMT 1 (CA Team 5). IMT is also managing the Knob incident. One mile southwest of Del Loma, CA. Timber and brush. Moderate fire behavior with uphill runs, torching and short-range spotting. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Knob, Six Rivers NF, USFS. Two miles south of Willow Creek, CA. Timber and brush. Moderate fire behavior with uphill runs, torching and short-range spotting. Communities of Willow Creek and Salyer and numerous residences threatened. Evacuations, area, road and trail closures in effect.

River Complex (3 fires), Klamath NF, USFS. NIMO (Team 3) and IMT 2 (CA Team 13). Nine miles southwest of Etna, CA. Timber and brush. Active fire behavior with flanking, group torching and short-range spotting. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Antelope, Klamath NF, USFS. IMT 1 (SA Red Team). Twenty miles northeast of McCloud, CA. Timber and brush. Moderate fire behavior with single tree torching, short-range spotting and creeping. Several communities and numerous structures threatened. Area, road and trail closures in effect.

McCash, Six Rivers NF, USFS. IMT 2 (GB Team 3). Fourteen miles northeast of Somes Bar, CA. Timber, brush and short grass. Active fire behavior with running, flanking and torching. Several communities and numerous structures threatened. Evacuations, area, road and trail closures in effect.

McFarland, Shasta-Trinity NF, USFS. Transfer of command from IMT 2 (CA Team 11) back to the local unit will occur today. Four miles southeast of Wildwood, CA. Timber, chaparral and brush. Minimal fire behavior with smoldering. Area and trail closures in effect.

## Northwest Area (PL 5)

| New fires: | 8 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 23 |
| Type 1 IMTs committed: | 5 |
| Type 2 IMTs committed: | 9 |

Twenty-five Mile, Okanogan-Wenatchee NF, USFS. IMT 1 (SW Team 1) and IMT 1 (PNW Team 3). Twelve miles northwest of Chelan, WA. Short grass, brush and timber. Active fire behavior with uphill runs, flanking and torching. Numerous structures and communication infrastructure threatened. Area, road and trail closures in effect.

Devil's Knob Complex (2 fires), Umpqua NF, USFS. IMT 1 (Florida Forest Service Red Team). Twenty miles northeast of Azalea, OR. Timber and medium slash. Moderate fire behavior with backing, flanking and single tree torching. Community of Ash Valley and structures threatened. Area, road and trail closures in effect.

Schneider Springs, Okanogan-Wenatchee NF, USFS. IMT 1 (PNW Team 2). Eighteen miles northwest of Naches, WA. Short grass, timber and brush. Active fire behavior with wind-driven runs, flanking and backing. Several communities, numerous structures and communication infrastructure threatened. Area, road and trail closures in effect.

Rough Patch Complex (4 fires), Umpqua NF, USFS. IMT 1 (NR Team 1). IMT is also managing the Jack incident. Eighteen miles southwest of Oakridge, OR. Closed timber litter and timber. Active fire behavior with uphill runs, torching and flanking. Area, road and trail closures in effect.

Jack, Umpqua NF, USFS. Thirty-one miles east of Roseburg, OR. Closed timber litter and timber. Moderate fire behavior with isolated torching, flanking and backing. Area, road and trail closures in effect.

Middle Fork Complex (2 fires), Willamette NF, USFS. IMT 2 (NW Team 13). IMT 2 (NW Team 6) mobilizing. Nine miles northeast of Oakridge, OR. Timber and closed timber litter. Active fire behavior with flanking, backing and torching. Communities of Oakridge and Westfir and structures threatened. Evacuations, area, road and trail closures in effect.

Bull Complex, Mt. Hood NF, USFS. IMT 2 (GB Team 4). IMT 2 (NR Team 4) mobilizing. Twenty-five miles northeast of Mill City, OR. Timber and closed timber litter. Active fire behavior with backing, torching and shortrange spotting. Area, road and trail closures in effect.

Chickadee Creek, Northeast Region, DNR. IMT 2 (NW Team 12). IMT is also managing the Walker Creek incident. Sixteen miles northwest of Tonasket, WA. Timber and light slash. Moderate fire behavior with flanking, backing and isolated torching.

Walker Creek, Northeast Region, DNR. Four miles northwest of Wauconda, WA. Timber and closed timber litter. Moderate fire behavior with backing, creeping and isolated torching. Numerous residences and infrastructure threatened. Area, road and trail closures in effect.

Summit Trail, Colville Agency, BIA. IMT 2 (NW Team 7). IMT 2 (SW Team 4) mobilizing. IMT is also managing the Bulldog Mountain and Mack Mountain incidents. Seventeen miles west of Inchelium, WA. Timber and light slash. Moderate fire behavior with flanking, backing and isolated torching. Communication infrastructure threatened. Area and road closures in effect.

Bulldog Mountain, Colville NF, USFS. Sixteen miles northwest of Kettle Falls, WA. Brush, closed timber litter and timber. Moderate fire behavior with flanking, backing and isolated torching. Area and road closures in effect.

Mack Mountain, Colville NF, USFS. Fifteen miles north of Kettle Falls, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area and road closures in effect.

Muckamuck, Colville NF, USFS. IMT 2 (NW Team 9). IMT is also managing the Cedar Creek and Cub Creek 2 incidents. Four miles northwest of Conconully, WA. Brush, closed timber litter and timber. Moderate fire behavior with backing, creeping and smoldering. Numerous structures threatened. Evacuations, area, road and trail closures in effect.

Cedar Creek, Okanogan-Wenatchee NF, USFS. Fifteen miles northwest of Winthrop, WA. Brush, closed timber litter and timber. Moderate fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

Cub Creek 2, Southeast Region, DNR. Five miles north of Winthrop, WA. Brush, closed timber litter and timber. Moderate fire behavior with backing, creeping and smoldering. Several communities and infrastructure threatened. Area, road and trail closures in effect.

Green Ridge, Umatilla NF, USFS. IMT 2 (NW Team 8). Thirty miles east of Walla Walla, WA. Short grass, timber and medium slash. Minimal fire behavior with backing, creeping and smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Fox Complex, Fremont-Winema NF, USFS. Fourteen miles west of Lakeview, OR. Timber, short grass and brush. Minimal fire behavior with smoldering. Infrastructure threatened.

Ford Corkscrew, Northeast Region, DNR. Eleven miles south of Springdale, WA. Timber and closed timber litter. No new information. Last report unless new information is received.

## Northern Rockies Area (PL 3)

| New fires: | 2 |
| :--- | :---: |
| New large incidents: | 0 |
| Uncontained large fires: | 19 |
| Type 2 IMTs committed: | 2 |

Alder Creek, Beaverhead-Deerlodge NF, USFS. IMT 2 (NR Team 5). IMT is also managing the Trail Creek and Christensen incidents. Twenty miles northwest of Wisdom, MT. Timber and brush. Moderate fire behavior with group torching, short-range spotting and creeping. Area, road and trail closures in effect.

Trail Creek, Beaverhead-Deerlodge NF, USFS. Twenty miles west of Wisdom, MT. Timber and brush. Minimal fire behavior with group torching, short-range spotting and creeping. Area, road and trail closures in effect.

Christensen, Beaverhead-Deerlodge NF, USFS. Ten miles northeast of Wisdom, MT. Timber and brush. Moderate fire behavior with group torching, short-range spotting and creeping. Area, road and trail closures in effect.

Burnt Peak, Kootenai NF, USFS. IMT 2 (NR Team 7). IMT is also managing the South Yaak incident. Nine miles southwest of Troy, MT. Timber and light slash. Minimal fire behavior with smoldering and creeping. Area, road and trail closures in effect.

South Yaak, Kootenai NF, USFS. Four miles northwest of Troy, MT. Timber and light slash. Minimal fire behavior with smoldering and creeping. Area, road and trail closures in effect.

American Fork, Helena-Lewis and Clark NF, USFS. Twenty-four miles southwest of Harlowton, MT. Short grass, timber and brush. Minimal fire behavior. Area, road and trail closures in effect.

Character Complex, Idaho Panhandle NF, USFS. Three miles north of Kellogg, ID. Timber and brush. Moderate fire behavior with single tree torching, backing and smoldering. Communities of Murray and Eagle threatened. Area, road and trail closures in effect.

Stateline Complex (7 fires), Idaho Panhandle NF, USFS. Twenty-two miles southwest of Superior, MT. Closed timber litter, timber and light slash. Minimal fire behavior with creeping and smoldering. Road and trail closures in effect.

Granite Pass Complex (2 fires), Lolo NF, USFS. Thirty miles southwest of Missoula, MT. Timber, closed timber litter and brush. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

West Lolo Complex, Lolo NF, USFS. Six miles north of St. Regis, MT. Timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

Harris Mountain, Cascade County. Seven miles southeast of Cascade, MT. Closed timber litter and timber. Minimal fire behavior. Structures threatened.

Boulder 2700, Flathead Agency, BIA. Three miles northeast of Finley Point, MT. Closed timber litter and timber. Minimal fire behavior with smoldering and creeping. Numerous residences threatened. Area and trail closures in effect.

Cougar Rock Complex (3 fires), Clearwater Potlach Timber Protective Association, IDL. Seventeen miles northeast of Elk River, ID. Light slash and timber. No new information.

Predictive Services Discussion: Upper-level troughing will continue over the Pacific Northwest and Northern Rockies, extending into northern California and the northern Great Basin. High pressure will remain over the southern Plains with deep, moist south to southwest flow aloft continuing over the Southwest and southern and eastern Great Basin into Colorado. The remnants of Ida will move eastward across the Appalachians into the Mid-Atlantic and southern New England, with heavy rain and flooding likely. Dry and breezy conditions are still expected along the eastern Sierra into the northern Great Basin, southern Montana, and northern and western Wyoming with poor overnight relative humidity recovery. Elevated conditions are also possible across the central High Plains as dry southerly flow increases ahead of lee troughing along the Front Range. Deep monsoon moisture will result in scattered to numerous thunderstorms with wetting rain across far southeast California, the Southwest, southern and eastern Great Basin, and Colorado Rockies into southern Wyoming. Isolated to scattered mixed wet and dry thunderstorms are also possible along the edge of the moisture from central Nevada into northern Utah and southwest and central Wyoming.

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know the outcome. What are the conditions? What are you thinking? What are YOU doing?

## Sundance Fire (Idaho) - September 1, 1967

#### Abstract

Incident Summary: The Sundance Fire is remembered for its extreme fire behavior. A crown fire, in heavy timber, pushed the fire 16 miles in a single burning period. Two firefighters perished in the blowup event. Factors Influencing Fire Behavior: Lightning started several fires in mid-August of 1967 in the Selkirk Mountains of northern Idaho. The area was in moderate drought conditions. The last wetting rain was in June, and fire danger was classified as extreme. Fuels in this mountainous area were mostly comprised of timber with areas of logging slash. One fire, the Sundance Fire, ignited near the west side of Sundance Mountain summit; it spread relatively slowly at the outset, growing to only 35 acres by August 23. On August 29 and 30, the fire made a major downhill run towards Priest Lake, pushed by strong northeast winds. By August 31, the fire was at 4,000 acres. On September 1, a dry cold front with very strong southwest winds moved over the fire area. The fire weather forecast issued at 0800 called for scattered afternoon and evening thunderstorms, temperatures down five degrees, humidity up 5\%, and southsouthwest winds at 12 to 18 mph . Human Factors and Fire Operations: In response to the fire's growth, a US Forest Service fire management team was ordered, and it assumed command of the incident at 1000 on September 1 . Much of the focus was on the fire's movement to the west, as there was no imminent threat perceived of the fire spreading to the east and over the Selkirk Divide. Indeed, earlier that morning, a dozer with operator and Sector Boss (similar to a Task Force Leader [TFLD]or Strike Team Leader Heavy Equipment [STEQ] in today's organization) were deployed on that side of the Divide, several miles northeast of the fire. Around 1100, they were briefed by a supervisor on work objectives and escape routes. The dozer was assigned to open up roads in the McCormick Creek drainage, starting near the Pack River and moving southwest and up canyon, towards the Selkirk Divide. Fault Lake, their designated safety zone, was four miles and 3,000 vertical feet further up the canyon, and work was to progress toward the safety zone. Due to limited supplies and equipment, the Sector Boss had neither a vehicle nor a two-way radio. The dozer operator had a knee injury that hampered his mobility.

The Blowup: On September 1, starting at 1300 with the onset of strong southwest winds, the Sundance Fire became very active, making a significant run up the Soldier Creek drainage, which is aligned mostly in a west to east direction, to the Selkirk Divide. Between 1400 and 1600, the fire crossed east over the Selkirk Divide and burned downslope through the southwest-to-northeast aligned McCormick Creek Canyon and then into the Pack River drainage, where the dozer had worked its way to within $1 / 4$ mile of Fault Lake. At 1600 , the fire overran the dozer operator and Sector Boss, killing both. During this blowup event, the Sundance Fire experienced winds of 30 to 50 mph from early afternoon into the night. In the nine-hour period from 1400 to 2300 , the fire increased by 50,000 acres and advanced 16 miles to the northeast, with long-range spotting up to 10 miles.

## Discussion Points:

Prior to the blowup, there were signals of escalating risk. Discuss the following:

- Given the predicted weather, extreme fire danger, and other factors, what are your concerns?
- The dozer operator was partially handicapped due to an injured knee. How would you handle an injury that limits your physical ability or that of a coworker?
- How did the alignment of general winds with major canyons and drainages affect fire behavior?
- The Sundance Fire was not predicted to spread into McCormick Creek. Once the fire advanced to the east side of the Divide, what actions would you take?
- Given similar circumstances, discuss how you and your crew could apply LCES throughout the day.
- In the Incident Response Pocket Guide (IRPG), PMS 461, review Human Factor Barriers to Situation Awareness and discuss this in relation to the Sundance Fire.
