

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, September 22, 2021 – 0730 MDT
National Preparedness Level 4**

National Fire Activity:

Initial attack activity:	Light (61 fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires: ***	50
NIMOs committed:	0
Type 1 IMTs committed:	9
Type 2 IMTs committed:	18

Nationally, there are 34 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

[Link](#) to Understanding the IMSR.

Two hundred twenty-five soldiers from the 23rd Brigade Engineer Battalion and 2-3 Infantry Battalion based out of Joint Base Lewis-McChord are deployed in support of the Dixie Fire.

One MAFFS C-130 airtanker and support personnel each from the 152nd Airlift Wing (Nevada Air National Guard), three MAFFS from the 302nd Airlift Wing (Colorado Air Force Reserve), two MAFFS from the 153rd Airlift Wing (Wyoming Air National Guard) and two from the 146th Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) and one RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 162nd Operations Group (Arizona Air National Guard) have been deployed to Sacramento, CA in support of wildland fire operations. Also supporting these aircraft are eight ground controllers from multiple U.S. Air National Guard squadrons.

Two fire suppression crews from Quebec, Canada are supporting fire suppression efforts in Washington State.

New fires:	10
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs committed:	5
Type 2 IMTs committed:	6

Caldor, Eldorado NF, USFS. IMT 2 (CA Team 12). Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Active fire behavior with short crown runs, uphill runs and spotting. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Dixie, Butte Unit, Cal Fire. Unified command between IMT 1 (CA Team 1), IMT 2 (CA Team 14), and IMT 2 (RM Team Black). IMT 2 (SA Gold Team) mobilizing. Fifteen miles northeast of Paradise, CA. Timber, brush and light slash. Minimal fire behavior with creeping and smoldering. Numerous structures and infrastructure threatened. Area, road and trail closures in effect.

River Complex (2 fires), Klamath NF, USFS. IMT 1 (CA Team 2). IMT 2 (CA Team 15) mobilizing. Nine miles southwest of Etna, CA. Timber and brush. Moderate fire behavior with group torching, backing and creeping. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

Monument, Shasta-Trinity NF, USFS. IMT 1 (NR Team 2). IMT 1 (SA Red Team) mobilizing. One mile southwest of Del Loma, CA. Timber and brush. Moderate fire behavior with isolated torching, flanking and backing. Several communities, numerous structures and infrastructure threatened. Area, road and trail closures in effect.

McCash, Six Rivers NF, USFS. IMT 1 (AK Team 1). Fourteen miles northeast of Somes Bar, CA. Timber, closed timber litter and brush. Minimal fire behavior with creeping, smoldering and backing. Structures threatened. Evacuations, area, road and trail closures in effect.

Antelope, Klamath NF, USFS. IMT 2 (CA Team 10). Twenty miles northeast of McCloud, CA. Timber and brush. Minimal fire behavior with creeping. Structures threatened. Area, road and trail closures in effect.

Ten Year Average Fires (2011 – 2020 as of today)	45,583
Ten Year Average Acres (2011 – 2020 as of today)	6,439,420

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: An upper-level trough will move onshore and into the northern Intermountain West, with the ridge shifting east and weakening across the West. An upper-level trough will continue to swing east through much of the eastern and southern US, with a closed upper low likely forming somewhere from the Ohio Valley into the Great Lakes. The associated cold front will push through northern Florida and the Appalachians to portions of the southeast Atlantic coast. A Pacific cold front will move through the Pacific Northwest and into the Great Basin and Northern Rockies. Dry and breezy conditions are expected for the Sierra Front, northern Montana, and portions of the northern Great Basin, Cascade Gaps, Wyoming, and southwest Montana. Post-frontal dry and breezy conditions are likely in central Texas as well. Much of the West will be dry, but isolated to scattered showers are likely in western Washington and northwest Oregon, with possible isolated showers in parts of the interior Northwest, northern Great Basin, and Northern Rockies. Thunderstorms and showers are expected from the Ohio Valley through the eastern Great Lakes, Mid-Atlantic, and into portions of the Northeast and Southeast, with heavy rain likely in the eastern Ohio Valley, central Appalachians, and eastern Great Lakes.

After Action Review (AAR) – Part 1

Fire Communication Category

How to Conduct an Effective AAR

An AAR is a professional discussion of an event. The objective is to identify successes and failures. It is a tool that leaders, teams, crews, and units can use to get maximum learning benefit from every incident or project. It is essential for wildland firefighters to learn from mistakes and to capitalize on successes. It is considered a valuable tool in high-risk professions, where the smallest mistakes can lead to disastrous results. **An AAR is not a critique and not a forum to assign blame. It is an open, honest, and professional discussion for purposes of improvement.**

Once you (the leader/facilitator) have demonstrated that the AAR works and that it will be part of your team's standard operating procedures, the discussion will become more open. Finding out **what** they did is not nearly as important as **why** they did it. Good active listening skills are essential. Do not immediately try to solve or correct the issue, but let it play out. Try to get to the root of the issue. The leader must be a part of the AAR and will have to accept criticism. This is important because the team will be looking for affirmation of the AAR process.

- An AAR is performed as immediately after the event as possible by the personnel involved.
- The leader's role is to ensure skilled facilitation of the AAR.
- Reinforce that respectful disagreement is okay. Keep focused on the what, not the who.
- Make sure everyone participates.
- Pay attention to time.
- Establish clear ground rules: encourage candor and openness, all participants have equal ownership, focus on improving performance, and keep all discussions confidential.
- End the AAR on a positive note.

1. What was planned?

Review the intent of the mission

Desired end state (what does right look like).

2. What actually happened?

Establish the facts

Pool multiple perspectives to build a shared picture of what happened.

3. Why did it happen?

Analysis of cause and effect

Provide progressive refinement for drawing out explanations of what occurred.

4. What are we going to do next time?

Correct weaknesses and sustain strengths

Focus on items you can fix, rather than external forces outside of your control.
