# National Interagency Coordination Center Incident Management Situation Report <br> Tuesday, September 28, 2021 - 0730 MDT <br> National Preparedness Level 4 

National Fire Activity:
Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:

Light (66 fires)
2 3
44
0
6
12

Nationally, there are 33 fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
Two hundred twenty-five soldiers from the 23rd Brigade Engineer Battalion and 2-3 Infantry Battalion based out of Joint Base Lewis-McChord are deployed in support of the Dixie Fire.

Two MAFFS from the $302^{\text {nd }}$ Airlift Wing (Colorado Air Force Reserve), one MAFFS from the $153^{\text {rd }}$ Airlift Wing (Wyoming Air National Guard) and one from the $146^{\text {th }}$ Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) and one RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 162nd Operations Group (Arizona Air National Guard) have been deployed to Sacramento, CA in support of wildland fire operations. Also supporting these aircraft are eight ground controllers from multiple U.S. Air National Guard squadrons.

## Northwest Area (PL 3)

| New fires: | 9 |
| :--- | :---: |
| New large incidents: | 1 |
| Uncontained large fires: | 15 |
| Type 1 IMTs committed: | 1 |
| Type 2 IMTs committed: | 4 |

Schneider Springs, Okanogan-Wenatchee NF, USFS. IMT 2 (NW Team 10). Eighteen miles northwest of Naches, WA. Short grass, timber and brush. Minimal fire behavior with smoldering and creeping. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Cougar Peak, Fremont-Winema NF, USFS. IMT 2 (NW Team 12). Fifteen miles northwest of Lakeview, OR. Timber, brush and medium slash. Minimal fire behavior with smoldering. Structures threatened. Area, road and trail closures in effect.

Devil's Knob Complex, Umpqua NF, USFS. IMT 1 (PNW Team 2). Twenty miles northeast of Azalea, OR. Timber and hardwood litter. Minimal fire behavior with backing, creeping and smoldering. Structures and infrastructure threatened. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Rough Patch Complex (4 fires), Umpqua NF, USFS. IMT 2 (NW Team 7). IMT is also managing the Jack incident. Eighteen miles southwest of Oakridge, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Jack, Umpqua NF, USFS. Thirty-one miles east of Roseburg, OR. Closed timber litter and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Bull Complex, Mt. Hood NF, USFS. IMT 2 (NW Team 13). Twenty-five miles northeast of Mill City, OR. Timber and closed timber litter. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Twenty-five Mile, Okanogan-Wenatchee NF, USFS. Twelve miles northwest of Chelan, WA. Short grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

Middle Fork Complex (2 fires), Willamette NF, USFS. Nine miles northeast of Oakridge, OR. Timber and light slash. Minimal fire behavior with creeping. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

* The Bone Place, Colville Agency, BIA. Fourteen miles east of Keller, WA. Timber and short grass. Moderate fire behavior with torching, smoldering and creeping. Residences threatened. Precipitation occurred over the fire area yesterday.

Cedar Creek, Okanogan-Wenatchee NF, USFS. Fifteen miles northwest of Winthrop, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Precipitation occurred over the fire area yesterday. Last report unless significant activity occurs.

Cub Creek 2, Southeast Region, DNR. Five miles north of Winthrop, WA. Brush, closed timber litter and timber. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect. Last report unless significant activity occurs.

Boundary, Salmon-Challis NF, USFS. Transfer of command from IMT 2 (GB Team 5) back to the local unit occurred yesterday. Twenty-four miles northwest of Stanley, ID. Timber, short grass and brush. Active fire behavior with group torching, short-range spotting and short crown runs. Structures threatened. Area, road and trail closures in effect. Last narrative report unless significant activity occurs.

***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

Predictive Services Discussion: An upper-level trough will move into the Intermountain West with an upper low over Colorado rejoins the upper-level flow. Upper ridging will extend from the Deep South through the western Great Lakes with troughing aloft remaining over the Northeast and Mid-Atlantic. A Pacific cold front will slide south and east during the day into the northern Plains, central Rockies, and southern Great Basin. Elevated to critical conditions are expected over southeast Montana, northeast Wyoming, and the western Dakotas today. Breezy to windy conditions are forecast over much of the Intermountain West and central Plains but relative humidity will be significantly higher. A band of showers will move through southern Idaho into western Montana with light rainfall before diminishing. Scattered mainly wet thunderstorms are forecast across eastern Arizona, eastern Utah, and the Rockies while more numerous showers and thunderstorms are likely over much of Texas into southern Oklahoma. Showers will continue over much of the Northwest into tonight with wetting rain.

## Escape Routes - Part 2

Operational Engagement Category

Escape routes are the paths available to firefighters from their current location when exposed to danger to an area free from danger. There should always be more than one escape route available to firefighters.

Escape routes are probably the most elusive component of Lookouts, Communications, Escape Routes, and Safety Zones (LCES). Their effectiveness changes continuously. As firefighters work along the fire perimeter, fatigue and spatial separation can increase the time required to reach the safety zone.

The most common escape routes (or part of an escape route) include the fireline. On an indirect or parallel fireline, situations become more complex. Unless safety zones have been identified ahead, as well as behind, a firefighters' retreat may not be possible.

- Discuss how you would judge the effectiveness of an escape route. Have you ever timed yourself using an escape route?
- Describe an instance when you were uncomfortably distant from your escape routes.
- Describe a method you have used to communicate the location of an escape route to your crews.
