## National Interagency Coordination Center Incident Management Situation Report Wednesday, September 29, 2021 – 0730 MDT National Preparedness Level 3

# National Fire Activity:

Initial attack activity:	Light (63 fires)
New large incidents:	2
Large fires contained:	1
Uncontained large fires: ***	41
NIMOs committed:	0
Type 1 IMTs committed:	6
Type 2 IMTs committed:	12

Nationally, there are 34 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**<u>Link</u>** to Geographic Area daily reports.

**Link** to Understanding the IMSR.

Two MAFFS from the 302<sup>nd</sup> Airlift Wing (Colorado Air Force Reserve), one MAFFS from the 153<sup>rd</sup> Airlift Wing (Wyoming Air National Guard) and one from the 146<sup>th</sup> Airlift Wing (California Air National Guard) have been deployed to McClellan, CA to support wildland fire operations nationally.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Sacramento, CA in support of wildland fire operations. Also supporting this aircraft are four ground controllers from multiple U.S. Air National Guard squadrons.

#### Northern California Area (PL 3)

New fires:	5
New large incidents:	0
Uncontained large fires:	7
Type 1 IMTs committed:	3
Type 2 IMTs committed:	6

**Fawn**, Shasta-Trinity Unit, Cal Fire. Transfer of command from IMT 1 (Cal Fire Team 4) back to the local unit will occur tomorrow. Two miles northeast of Shasta Lake City, CA. Timber and brush. Minimal fire behavior with smoldering. Several communities, residences and energy infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Caldor**, Eldorado NF, USFS. Transfer of command from IMT 2 (CA Team 12) to IMT 2 (CA Team 13) will occur today. Sixteen miles northeast of Plymouth, CA. Timber, light slash and brush. Minimal fire behavior with backing, creeping and smoldering. Several communities, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect.

**Dixie**, Butte Unit, Cal Fire. IMT 2 (RM Team Black) and IMT 2 (SA Gold Team). IMT 2 (GB Team 3) mobilizing. Fifteen miles northeast of Paradise, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Area, road and trail closures in effect.

**River Complex**, Klamath NF, USFS. IMT 2 (CA Team 15). Nine miles southwest of Etna, CA. Timber and brush. Minimal fire behavior with smoldering, creeping and backing. Several communities, numerous structures and infrastructure threatened. Area, road and trail closures in effect.

**Monument**, Shasta-Trinity NF, USFS. IMT 1 (SA Red Team). One mile southwest of Del Loma, CA. Timber and brush. Minimal fire behavior with creeping and smoldering. Community of Trinity Village, numerous structures and infrastructure threatened. Evacuations, area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

**McCash**, Six Rivers NF, USFS. IMT 1 (AK Team 1). Fourteen miles northeast of Somes Bar, CA. Timber, closed timber litter and brush. Minimal fire behavior with creeping and smoldering. Evacuations, area, road and trail closures in effect.

**Antelope**, Klamath NF, USFS. Twenty miles northeast of McCloud, CA. Timber and brush. Minimal fire behavior with creeping, smoldering and backing. Structures threatened. Area, road and trail closures in effect.

Predictive Services Discussion: An upper-level trough over the Intermountain West will weaken with a cut-off low beginning to form over the Southwest. Another upper trough is forecast to arrive in the Northwest in the afternoon and evening. Upper ridging will extend from the Southeast through the western Great Lakes with an upper low near New England and troughing into the Mid-Atlantic. A cold front will slowly move east across the Plains with the front stalling over the Southwest. A Pacific cold front will move into western Washington overnight. Brisk north to northwest winds are expected behind the cold front over the Front Range of the Rockies into eastern Montana, eastern Wyoming, and the adjacent High Plains. Locally gusty northeast winds are also likely in Santa Barbara County in southern California. Scattered to numerous showers and thunderstorms are likely across the Plains to the Mississippi River along and ahead of the cold front. Scattered thunderstorms are forecast over the Four Corners area, most numerous over the Colorado Rockies. Rain will move into western Washington overnight with heavy rain possible for the Olympics.

## **ESCAPE ROUTES – Part 3**

**Operational Engagement Category** 

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following while discussing escape from possible entrapment.

- Have a plan that includes trigger points.
  - <u>Trigger Point</u>: An observable event that triggers a pre-determined action. Example: If the temperature reaches 98 °F and relative humidity (RH) goes into single digits, the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
  - Does access to escape routes become more difficult as the day progresses?
  - Do you have more than one escape route?
  - Are all escape routes clearly marked?
  - Are all firefighters familiar with the escape routes?
- During an escape, time will be short. Describe considerations in this situation such as:
  - Maintain all critical equipment such as personal protective equipment (PPE) and radio. Discard gear that will not aid in your escape.
  - Maintain contact with all other crewmembers.
- Describe a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to safety zones and deployment areas.
