

**National Interagency Coordination Center  
Incident Management Situation Report  
Thursday, October 21, 2021 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity**

Initial attack activity:	Light (59 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires: ***	15
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	3

Nationally, there are 0 fires being managed under a strategy other than full suppression.

\*\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### **Southern California Area (PL 2)**

New fires: 9  
New large incidents: 0  
Uncontained large fires: 4  
Type 1 IMTs committed: 2  
Type 2 IMTs committed: 0

**KNP Complex** (2 fires), Sequoia & Kings Canyon National Parks, NPS. IMT 1 (CA Team 2). Nine miles northeast of Three Rivers, CA. Short grass, brush and timber. Minimal fire behavior with creeping and smoldering. Infrastructure, residences and structures threatened. Area, road and trail closures in effect.

**Windy**, Tule River Fire Department, BIA. Twenty-two miles east of Porterville, CA. Timber and brush. Moderate fire behavior with creeping and smoldering. Numerous residences and structures threatened. Restrictions, area, road and trail closures in effect.

**Alisal**, Los Padres NF, USFS. IMT 1 (CA Team 1). Twenty miles northwest of Santa Barbara, CA. Chaparral and grass. Minimal fire behavior with backing, creeping and smoldering. Area, road and trail closures in effect.

\*\*\*Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

\*\*\*Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

**Predictive Services Discussion:** A deep upper-level trough will move onshore the Pacific Northwest tonight with moderate to heavy precipitation expected across northern California and Northwest west of the Cascades today and tonight. Precipitation is also likely tonight into the northern Sierra and interior Northwest with snow above 8000 feet. Weak upper-level ridging is forecast over the Rockies with troughing over the eastern US. A cold front will move through the Appalachians into the Northeast, Mid-Atlantic, and Deep South with showers and thunderstorms ahead of it from the northern Gulf Coast, through the Appalachians and into the eastern Great Lakes and Northeast.

## Unfamiliar With Weather and Local Factors

*Weather – Fire Behavior Category*

What kinds of questions would you ask of local experts?

Does the operational period plan or Incident Action Plan (IAP) give you adequate weather information? What kinds of weather forecasts are available? What other weather or local information do you look for in the plan?

Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?

Is there any other way to obtain information? List common sources of information on weather and local factors. Examples include web-based Weather Activity Planner, Point Forecast Matrix, National Oceanic and Atmospheric Administration (NOAA) Internet Briefing.

### **To reduce risks:**

- Base all actions on current and expected fire behavior.
- Establish escape routes and safety zones.
- Post lookouts.
- Discuss a fire where you relied on information from the local unit. For example, where your fire knowledge and experience was very different from how they did things – such as in the southeastern United States or Alaska.
- Recognize and report visual indicators (clouds, weather observed, cold front passage, inversion breaking).
