

**National Interagency Coordination Center
Incident Management Situation Report
Friday, January 21, 2022 – 0730 MDT
National Preparedness Level 1**

National Fire Activity (January 14 – January 20, 2022):

Initial attack activity:	Light (198 fires)
New large incidents:	12
Large fires contained:	9
Uncontained large fires: ***	5
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 2)

New fires: 176
 New large incidents: 12
 Uncontained large fires: 5

* **Kingston**, Chickasaw Agency, BIA. Eight miles southwest of Kingston, OK. Timber, short and tall grass. Extreme fire behavior.

* **Blujay**, Eglin AFB, DOD. Eighteen miles southeast of Milton, FL. Timber. Minimal fire behavior with smoldering.

* **Rolling Pines**, Texas A & M Forest Service. Started on private land four miles east of Bastrop, TX. Timber, tall grass and southern rough. Minimal fire behavior with smoldering. Structures threatened.

Longleaf, Kisatchie NF, USFS. Seven miles north of Pitkin, LA. Short grass. No new information. Last report unless significant activity occurs.

Cedar Slash, Ouachita NF, USFS. Two miles northeast of Uniontown, AR. Timber and heavy slash. No new information. Last report unless significant activity occurs.

Ten Year Average Fires (2011 – 2020 as of today)	739
Ten Year Average Acres (2011 – 2020 as of today)	13,563

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: Gusty south winds with locally elevated conditions are possible over portions of eastern New Mexico and west Texas today with low relative humidity also forecast over much of central Texas and Oklahoma. A moderate to strong Santa Ana wind event will begin today across southern California and continue into Saturday with above normal temperatures, low relative humidity, and northeast wind gusts up to 70 mph. After lighter offshore winds into Monday, another Santa Ana event is possible for the middle of next week. Another period of elevated to locally critical conditions is possible across west Texas next Monday into Tuesday as well.

Low pressure will move through the Southeast today with rain for much of Georgia and Florida while rain changes to freezing rain and snow over the Carolinas. Light valley rain and mountain snow is also forecast for much of the Rockies into the Southwest today into Saturday. Periods of light snow are expected this weekend into mid-next week for the northern Plains, Great Lakes, and Northeast. Low pressure is likely to develop over the Gulf of Mexico and bring locally heavy rain to the Gulf Coast with rain spreading over much of the Southeast and Mid-Atlantic by mid-next week. Much of the West is forecast to be dry with temperatures near to above normal. Temperatures are forecast to be below normal for much of the CONUS east of the Rockies with much below normal temperatures for the Great Lakes and Northeast.

Communications (LCES)

Fire Communications Category

Effective communication is a critical component of safe and successful operations.

- Discuss the factors that can affect radio communication at the incident.
 - Knowledge of the radio issued to the individuals.
 - Net control, frequencies.
 - Line-of-sight restrictions.
 - Antenna polarization effect (direction of the antenna).
 - Minimizing noise interference.
 - Wide band vs. narrow band.
 - Potentially unfamiliar local jargon (e.g., Coulee, candlestick, fence post, etc.).

- How can you mitigate potential problems?
 - Implement effective communication procedures — be brief, use clear text and to-the-point messages.
 - Give a good comprehensive briefing. (Refer to the Briefing Checklist inside the back cover of the *Incident Response Pocket Guide* (IRPG), PMS 461).
 - Confirm that relayed information is received and understood.
 - Keep a continuous information flow (e.g., updates on weather, fire behavior, work progress; changes in strategy/tactics; arrival of additional resources; and solicitation of feedback).
 - Establish emergency check-in procedures.
 - Provide a minimum of four radios per 20-person firefighter crew.

- The Five Communication Responsibilities for all firefighters:
 - Brief others as needed.
 - Debrief your actions.
 - Communicate hazards to others.
 - Acknowledge messages.
 - Ask if you don't know.
