National Interagency Coordination Center Incident Management Situation Report Thursday, April 7, 2022 – 0730 MDT National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (74 Fires
New large incidents:	4
Large fires contained:	6
Uncontained large fires: ***	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

Link to Geographic Area daily reports.

Link to Understanding the IMSR.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

^{***}Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:44New large incidents:3Uncontained large fires:9

Interceptor, Seminole Tribe, BIA. Twenty-one miles southeast of Immokalee, FL. Southern rough and tall grass. Minimal fire behavior with creeping and smoldering. Structures threatened.

Beaver River, Oklahoma DOF. Six miles southwest of Floris, OK. Tall grass and timber. Extreme fire behavior with running and spotting.

Seymour, Tennessee DOF. Started on private land six miles southeast of Seymour, TN. Dormant brush and hardwood slash. Minimal fire behavior. Reduction in acreage due to more accurate fire mapping.

Beech, Daniel Boone NF, USFS. Four miles northeast of Manchester, KY. Timber. Minimal fire behavior with smoldering. Reduction in acreage due to more accurate fire mapping.

Hurricane, Daniel Boone NF, USFS. Five miles southwest of Oneida, KY. Timber. Minimal fire behavior with smoldering.

Valley View Ranch, Georgia Forestry Commission. Seven miles northwest of Trion, GA. Timber. Minimal fire behavior with creeping and smoldering.

* **Sand Creek**, Texas A&M Forest Service. Started on private land seven miles east of Lefors, TX. Grass. Moderate fire behavior with backing and smoldering.

Crittenburg Complex, Texas A&M Forest Service. Started on private land 12 miles southeast of Gatesville, TX. Tall grass and brush. Minimal fire behavior. Numerous residences threatened.

Rocky Point, National Forests in Florida, USFS. Four miles east of Salt Springs, FL. Southern rough. No new information.

***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

<u>Predictive Services Discussion:</u> Critical fire weather conditions will develop again today as dry, northwesterly flow remains over the central and southern Plains, with the strongest winds and lowest relative humidity likely overlapping from southeast Colorado and western Kansas through the Texas Panhandle and western Oklahoma. Dry and breezy conditions are also expected in portions of the Southwest, central, south, and east Texas, central Gulf Coast, and Lower Mississippi Valley. Well above average temperatures and dry and breezy conditions will continue in southern California. Thunderstorms are likely along the East Coast, with scattered rain and snow showers from the Great Lakes through the Northeast, including potentially heavy snow in far northern Wisconsin and the Upper Peninsula of Michigan.

SAFFNFT

Fire Communication Category

The SAFENET system is a way for firefighters and support staff to report unsafe or unhealthy situations and near-misses. SAFENET is an easy, quick way to report a safety concern. It allows firefighters to be involved in the daily job of being safe and keeping others safe by documenting and helping to resolve safety issues. It is also a way for fire managers to hear about and correct hazardous conditions, collect and track important safety data, and identify trends that could be developing.

Here are some facts about SAFENET and how it works:

- Individuals who observe or are involved in an unsafe situation should initiate immediate corrective action, if possible. The occurrence should then be reported via SAFENET.
- Reports should identify unsafe situations in wildland fire, all-hazard operations, training, and other related work environments.
- SAFENET is a confidential database. Users are encouraged but not required to put their name and contact information on the report.
- SAFENET reports are sanitized to display safety and health-related information only, and they will not identify the names of individuals, crews, or other resources.
- If the reporting party did not observe the situation first-hand, the SAFENET report will likely not be published. Instead of filing a report, encourage those who were directly involved to do so.
- SAFENET reports that do not include the name of the incident and/or location of the event will not be posted.
- **SAFENET reports** that contain unprofessional content (e.g., personal attacks/slander, character defamation) will not be posted, or the offensive comments will be removed prior to posting.
- There is no punishment or penalty for filing a SAFENET report, nor is it mandatory.

Submit a SAFENET Report

Submit directly to the <u>SAFENET</u> system: https://safenet.nifc.gov/safenet.cfm_

For information regarding the SAFENET program please contact: <u>SAFENET Administrator@blm.gov.</u>
