National Interagency Coordination Center Incident Management Situation Report Friday, April 8, 2022 – 0730 MDT National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (76 Fires)
New large incidents:	5
Large fires contained:	4
Uncontained large fires: ***	11
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	0

Nationally, there are 0 fires being managed under a strategy other than full suppression.

Link to Geographic Area daily reports.

Link to Understanding the IMSR.

This report will post Monday – Friday at 0730 Mountain time unless significant activity occurs.

	Active Incident Resource Summary

Total	58	357,123	17	291	8	1,385	-22				

^{***}Uncontained large fires include only fires being managed under a full suppression strategy.

Southern Area (PL 3)

New fires:18New large incidents:3Uncontained large fires:8

Beaver River, Oklahoma DOF. Six miles southwest of Floris, OK. Tall grass and timber. Moderate fire behavior with smoldering.

- * 23, Oklahoma DOF. Six miles northeast of Forgan, OK. Tall grass and brush. Extreme fire behavior with wind-driven runs, running and spotting. Structures threatened.
- * **Britt**, Texas A&M Forest Service. Started on private land 11 miles east of Wheeler, TX. Tall grass and brush. Extreme fire behavior.

Interceptor, Seminole Tribe, BIA. Twenty-one miles southeast of Immokalee, FL. Southern rough and tall grass. No new information.

Beech, Daniel Boone NF, USFS. Four miles northeast of Manchester, KY. Timber. No new information.

Hurricane, Daniel Boone NF, USFS. Five miles southwest of Oneida, KY. Timber. No new information.

Crittenburg Complex, Texas A&M Forest Service. Started on private land 12 miles southeast of Gatesville, TX. Tall grass and brush. No new information.

Rocky Point, National Forests in Florida, USFS. Four miles east of Salt Springs, FL. Southern rough. No new information. Last report unless new information is received.

^{***}Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

Predictive Services Discussion: Elevated to critical conditions are likely across much of the central and southern Plains where northwest winds will gust to 45 mph amid minimum relative humidity of 5-20%. Breezy and dry conditions are also forecast across much of Gulf Coast from Texas to the Florida Panhandle. West to northwest winds 15 to 25 mph with gusts to 40 mph are likely coinciding with minimum relative humidity of 15-25%. Record high temperatures and very low relative humidity will continue across southern California, with much above normal temperatures across much of the West, including the Great Basin, Rockies, and Southwest. Light mixed precipitation is forecast across much of the Great Lakes, Ohio Valley, Appalachians, and Northeast. Moderate precipitation, including high elevation snow, will spread across western Oregon and Washington, with lighter precipitation into the northern Rockies.

SAFENET

Fire Communication Category

The SAFENET system is a way for firefighters and support staff to report unsafe or unhealthy situations and near-misses. SAFENET is an easy, quick way to report a safety concern. It allows firefighters to be involved in the daily job of being safe and keeping others safe by documenting and helping to resolve safety issues. It is also a way for fire managers to hear about and correct hazardous conditions, collect and track important safety data, and identify trends that could be developing.

Here are some facts about SAFENET and how it works:

- Individuals who observe or are involved in an unsafe situation should initiate immediate corrective action, if possible. The occurrence should then be reported via SAFENET.
- Reports should identify unsafe situations in wildland fire, all-hazard operations, training, and other related work environments.
- SAFENET is a confidential database. Users are encouraged but not required to put their name and contact information on the report.
- SAFENET reports are sanitized to display safety and health-related information only, and they will not identify the names of individuals, crews, or other resources.
- If the reporting party did not observe the situation first-hand, the SAFENET report will likely not be published. Instead of filing a report, encourage those who were directly involved to do so.
- SAFENET reports that do not include the name of the incident and/or location of the event will not be posted.
- **SAFENET reports** that contain unprofessional content (e.g., personal attacks/slander, character defamation) will not be posted, or the offensive comments will be removed prior to posting.
- There is no punishment or penalty for filing a SAFENET report, nor is it mandatory.

Submit a SAFENET Report

Submit directly to the <u>SAFENET</u> system: https://safenet.nifc.gov/safenet.cfm_

For information regarding the SAFENET program please contact: SAFENET Administrator@blm.gov.
