# National Interagency Coordination Center Incident Management Situation Report Monday, April 25, 2022 - 0730 MDT <br> National Preparedness Level 2 

National Fire Activity (April 22, 2022 - April 24, 2022):

Initial attack activity:
New large incidents:
Light (146 fires)
Large fires contained: 11

Uncontained large fires: *** 11
Area Command teams committed: 0
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
**Complex IMTs committed:

0
4
1
1
${ }^{* *}$ Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are two fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
This report will post Monday - Friday at 0730 Mountain time unless significant activity occurs.

Southwest Area (PL 4)
New fires:
New large incidents: 4
Uncontained large fires: 6
Type 1 IMTs committed: 4
Type 2 IMTs committed: 1
Hermits Peak, Santa Fe NF, USFS. IMT 1 (SW Team 1). Includes acreage from the previously reported Calf Canyon incident. Twelve miles northwest of Las Vegas, NM. Timber. Active fire behavior with uphill runs, torching and spotting. Numerous structures threatened. Evacuations, area, road and trail closures.

Crooks, Prescott NF, USFS. IMT 1 (CA Team 4). Eleven miles south of Prescott, AZ. Timber and chaparral. Extreme fire behavior with wind-driven runs, short-range spotting and backing. Communication infrastructure and numerous structures threatened. Evacuations, area, road and trail closures in effect.

Cooks Peak, Las Vegas District, New Mexico State Forestry. IMT 2 (SW Team 5). Five miles north of Ocate, NM. Timber, grass and brush. Active fire behavior with uphill runs, flanking and group torching. Residences threatened. Evacuations and road closures in effect.

* Cerro Pelado, Santa Fe NF. IMT 1 (SA Red Team). Seven miles east of Jemez Springs, NM. Timber and brush. Moderate fire behavior with creeping, backing and flanking. Communication infrastructure and numerous residences threatened. Evacuations, area and road closures in effect.

Tunnel, Coconino NF, USFS. IMT1 (PNW Team 3). Nine miles northeast of Flagstaff, AZ. Timber and chaparral. Moderate fire behavior with flanking and creeping. Communication infrastructure and numerous structures threatened.

* Mitchell, Las Vegas District, New Mexico State Forestry. Seven miles east of Mosquero, NM. Grass. Extreme fire behavior.

McBride, Capitan District, New Mexico State Forestry. One mile southeast of Ruidoso, NM. Light slash and grass. Minimal fire behavior with smoldering.

**Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

Predictive Services Discussion An upper low will approach the Pacific Northwest coast with ridging over much of the Southwest. Meanwhile, an upper trough will move into the Great Lakes and push a slow-moving cold front into the eastern Great Lakes, western Appalachians, Lower Mississippi Valley, and Texas Gulf Coast. Very warm temperatures and low afternoon relative humidity are forecast for the Mojave Desert into the Southwest west of the Continental Divide. Locally elevated conditions are possible across the central Plains due to post-frontal north winds. Showers and thunderstorms are expected along the eastern front from central and eastern Texas through the western Appalachians into western New York. Rain with high elevation snow will move into the Northwest and Idaho Panhandle this afternoon and tonight.

After Action Review (AAR) - Part 2
Fire Communication Category
The Chainsaw AAR

The scenario: It's late. The crew has worked the fire for sixteen hours straight. No one has eaten a hot meal for days and, oh yeah, you might as well be cold.

No time for an AAR? Think again! There's plenty of time for a chainsaw AAR.
The idea behind the chainsaw AAR is simple: speed. When you need to get an AAR done quickly, try this simple format.

1. Have the team form a loose circle.
2. Start with a single team member and ask one of these questions:

- What is one thing that went well on this shift?
- What is one thing that did not go well on this shift?
- What is one thing you would do differently next time?
- What is one thing you learned today?

3. Continue around the circle until everyone has had a chance. It may be necessary to place a time limit on each individual (such as 30 seconds).
4. Avoid unnecessary discussion (dinner is waiting).
5. Note the comments for future discussion.
