# National Interagency Coordination Center <br> Incident Management Situation Report 

Friday, April 29, 2022 - 0730 MDT
National Preparedness Level 2

## National Fire Activity:

Initial attack activity:
New large incidents:
Large fires contained:
Uncontained large fires: ***
Area Command teams committed:
NIMOs committed:
Type 1 IMTs committed:
Type 2 IMTs committed:
**Complex IMTs committed:

Light (128 fires)
3
4
11
0
0
5
1
0
***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are two fires being managed under a strategy other than full suppression.
***Uncontained large fires include only fires being managed under a full suppression strategy.
Link to Geographic Area daily reports.
Link to Understanding the IMSR.
This report will post Monday - Friday at 0730 Mountain time unless significant activity occurs.

| Active Incident Resource Summary |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Southwest Area (PL 4)
New fires: 5
New large incidents: 0
Uncontained large fires: 6
Type 1 IMTs committed: 5
Type 2 IMTs committed: 1
Hermits Peak, Santa Fe NF, USFS. Transfer of command from IMT 1 (SW Team 1) to IMT 1 (SW Team 2) will occur on $5 / 1$. Twelve miles northwest of Las Vegas, NM. Timber. Extreme fire behavior with wind-driven runs, group torching and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Cerro Pelado, Santa Fe NF. IMT 1 (SA Red Team). Seven miles east of Jemez Springs, NM. Timber and brush. Moderate fire behavior with torching, backing and flanking. Numerous residences threatened. Evacuations and area closures in effect.

Crooks, Prescott NF, USFS. IMT 1 (CA Team 4). Eleven miles south of Prescott, AZ. Timber and chaparral. Active fire behavior with wind-driven runs, short-range spotting and backing. Communication infrastructure and numerous structures threatened. Evacuations, area, road and trail closures in effect.

Cooks Peak, Las Vegas District, New Mexico State Forestry. IMT 2 (SW Team 5). Five miles north of Ocate, NM. Timber, grass and brush. Moderate fire behavior with flanking, backing and single tree torching. Residences threatened. Evacuations and road closures in effect.

Tunnel, Coconino NF, USFS. Transfer of command from IMT1 (PNW Team 3) back to the local unit will occur today. Nine miles northeast of Flagstaff, AZ. Timber and brush. Minimal fire behavior with creeping and isolated torching. Communication infrastructure and numerous structures threatened. Area, road and trail closures in effect.

Mitchell, Las Vegas District, New Mexico State Forestry. Seven miles east of Mosquero, NM. Grass. Minimal fire behavior.

McBride, Capitan District, New Mexico State Forestry. One mile southeast of Ruidoso, NM. Light slash and grass. Minimal fire behavior.

**Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments. ***Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

Predictive Services Discussion: An upper trough will move into the central and northern Plains tonight with a strong surface low developing over the central Plains today and tonight. Upper ridging will progress into the Great Lakes with low pressure remaining off the New England coast. Elevated to critical west to southwest winds will develop across much of Colorado and New Mexico into the adjacent High Plains with an area of extremely critical conditions over portions of northeast New Mexico, southeast Colorado, and southwest Kansas where downslope enhancement will occur. Elevated to locally critical conditions due to brisk northwest winds are expected across portions of the Lower Colorado Valley into Arizona as well. Elevated to locally critical conditions will develop again across portions of the Mid-Atlantic and southern New England northwest winds $15-30 \mathrm{mph}$ with gust to 40 mph and relative humidity drops to 10-25\%.

Showers and thunderstorms, some severe, will develop in the afternoon across much of Nebraska, Kansas, and Oklahoma eastward into the Mid-Mississippi Valley. Heavy rain will fall across the northern Plains with areas of flooding. Showers are also likely to spread into the Northwest from the Cascades westward tonight as well while scattered afternoon thunderstorms continue across the southern Florida peninsula.
