National Interagency Coordination Center Incident Management Situation Report Saturday, May 14, 2022 – 0730 MDT National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (101 fires
New large incidents:	5
Large fires contained:	4
Uncontained large fires: **	10
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1
***Complex IMTs committed:	1

^{***}Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are no fires being managed under a strategy other than full suppression.

Link to Geographic Area daily reports.

SACC	16	39,331	0	28	0	125	14
Total	30	409,156	94	320	63	4,502	90

^{**}Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 4)

New fires:	4
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	4
Type 2 IMTs committed:	1

Hermits Peak, Santa Fe NF, USFS. Transfer of command from IMT 1 (SW Team 2) to IMT 1 (SW Team 1) and IMT 1 (CA Team 5) will occur tomorrow. IMT 2 (SW Team 3). Twelve miles northwest of Las Vegas, NM. Grass and timber. Active fire behavior with backing, group torching and short-range spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Cerro Pelado, Santa Fe NF, USFS. IMT 1 (GB Team 1). Seven miles east of Jemez Springs, NM. Grass, timber and heavy slash. Moderate fire behavior with backing and flanking. Residences threatened. Evacuations, area, road and trail closures in effect.

Bear Trap, Cibola NF, USFS. Twenty-two miles southwest of Magdalena, NM. Timber, grass and brush. Moderate fire behavior with running, flanking and backing. Structures threatened. Area, road and trail closures in effect.

Crooks, Prescott NF, USFS. Eleven miles south of Prescott, AZ. Timber and chaparral. Active fire behavior with smoldering, creeping and flanking. Area, road and trail closures in effect.

San Rafael, Southeast District, Arizona DOF. One mile northeast of Lochiel, AZ. Brush and short grass. Moderate fire behavior with creeping and smoldering.

Tunnel, Coconino NF, USFS. Nine miles northeast of Flagstaff, AZ. Timber and brush. Minimal fire behavior with smoldering. Numerous structures threatened. Area, road and trail closures in effect.

Ten Year Average Fires (2012 – 2021 as of today)	18,284
Ten Year Average Acres (2012 – 2021 as of today)	755,753

^{***}Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

^{***}Additional wildfire information is available through the Geographic Areas at https://gacc.nifc.gov/

<u>Predictive Services Discussion</u>: Upper ridging over the Southwest will build north across the West while an upper trough moves into the northern Plains. Upper ridging will continue over New England with the upper low over the Southeast gradually weakens. A cold front will move into the Great Lakes and Mid-Mississippi Valley but stall in the southern Plains. Very dry conditions with minimum relative humidity in the single digits and poor overnight recovery will continue over the southern Great Basin, southern Colorado, Southwest, and adjacent High Plains. While winds expected to remain light in most areas, elevated conditions are possible over portions of southern Colorado where winds will be strongest. Dry and breezy conditions are forecast across Wyoming and eastern Montana today as well. Scattered showers with isolated thunderstorms will develop across the Northwest, Idaho, and western Montana. Scattered showers and thunderstorms are likely across much of the eastern US east of the Mississippi Valley, with light to moderate rainfall.

Entrapment Avoidance

Operational Engagement Category

When determining strategy and tactics, avoid situations where firefighters may become entrapped. Consider the following discussion points related to escape routes and safety zones.

- Discuss the three types of safety zones and describe examples.
 - The burn/black
 - Natural features
 - Constructed sites
- Discuss the guidelines for size and distance separation to avoid radiant heat injury.
 - Four times the maximum flame height (20 foot-flame height x 4 = 80 foot-radius from firefighters)
 - Size based on amount of resources and equipment
- Discuss heat impact factors that will affect the guidelines for distance separation.
 - Convection heat from wind and terrain features
 - Location relative to fire spread
 - Reburn potential of fuel in safety zone
- Discuss how firefighters have a right to know the location of their escape routes and safety zones at all times.
- Discuss how firefighters have a right to ask for clarification when faced with unclear instructions or fear of the unknown.
- Describe a basic procedure for identification of effective escape routes and safety zones.
 - Observe
 - Visualize
 - Identify
 - Time
 - Inform
 - Evaluate
