National Interagency Coordination Center Incident Management Situation Report Monday, May 23, 2022 – 0730 MDT National Preparedness Level 2

National Fire Activity:

Initial attack activity:	Light (73 fires)
New large incidents:	1
Large fires contained:	5
Uncontained large fires: **	14
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	3
Type 2 IMTs committed:	5
***Complex IMTs committed:	2

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are no fires being managed under a strategy other than full suppression. **Uncontained large fires include only fires being managed under a full suppression strategy.

<u>Southwest Area (PL 5)</u>	
New fires:	16
New large incidents:	0
Uncontained large fires:	6
Type 1 IMTs committed:	3
Type 2 IMTs committed:	4

Hermits Peak, Santa Fe NF, USFS. IMT 1 (SW Team 1), IMT 1 (CA Team 2) and IMT 1 (CA Team 5). Twelve miles northwest of Las Vegas, NM. Grass and timber. Active fire behavior with uphill runs, group torching and short-range spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

Black, Gila NF, USFS. IMT 2 (SW Team 5). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with uphill runs, flanking and spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

Bear Trap, Cibola NF, USFS. Transfer of command from IMT 2 (SW Team 4) to IMT 2 (CA Team 10) will occur tomorrow. Twenty-two miles southwest of Magdalena, NM. Timber. Active fire behavior with running, flanking and backing. Structures threatened. Area, road and trail closures in effect.

Cerro Pelado, Santa Fe NF, USFS. IMT 2 (RM Team 3). Seven miles east of Jemez Springs, NM. Grass, brush and timber. Minimal fire behavior with creeping and smoldering. Evacuation, area, road and trail closures in effect.

Biggs, Capitan District, New Mexico State Forestry. Seven miles east of Corona, NM. Brush and grass. Moderate fire behavior with creeping and isolated torching.

Burchard 519, Cimmaron District, New Mexico State Forestry. Twenty-two miles northeast of Des Moines, NM. Brush and grass. Minimal fire behavior with backing, creeping and smoldering. Structures threatened.

Predictive Services Discussion: Upper troughing is forecast over the Rockies into the High Plains with a strong upper ridge remaining over the Gulf Coast into the Northeast. A short-wave trough will move into the Northwest this afternoon with a cold front moving through the Northwest and into the northern Rockies and northern Great Basin. Breezy and dry west winds are expected across much of the Arizona into central New Mexico with isolated mixed wet and dry thunderstorms along the dry line across the eastern plains for New Mexico. Very warm and dry north winds are forecast for the Sacramento Valley this afternoon continuing into tonight with poor overnight relative humidity recovery. Low to very low afternoon relative humidity is forecast across the Northeast and the southern Great Basin as well, but winds will be light. Widespread showers and thunderstorms will develop along and near a stationary front from the Carolinas west into central Texas and Oklahoma with heavy rain and flooding possible. Scattered showers and thunderstorms will develop across the Northwest into the northern Rockies and northern Plains as well. A cooling trend is forecast for much of the Alaska Interior today with higher relative humidity but conditions will remain dry for most of the state except for light showers over portions of south-central Alaska.

Escape Routes: Take 5@2

Operational Engagement Category

Consider the following scenario:

It's 1400, you have been working all morning. How far away are your safety zones? Safety zones are only good if you can reach them. How long will your escape route take? What is the condition of the crew? How long will it take your slowest member to get there? Are your expectations realistic? Look at the times below. If your fire blows up right now, can you, and every member of your crew, make it to your safety zone?
