

**National Interagency Coordination Center
Incident Management Situation Report
Wednesday, May 25, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (68 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires: **	9
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	4
Type 2 IMTs committed:	4
***Complex IMTs committed:	1

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are no fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Southwest Area (PL 5)

New fires:	6
New large incidents:	1
Uncontained large fires:	6
Type 1 IMTs committed:	4
Type 2 IMTs committed:	3

Hermits Peak, Santa Fe NF, USFS. IMT 1 (SW Team 1), IMT 1 (CA Team 2) and IMT 1 (CA Team 5). NIMO (Team 2) and IMT 1 (PNW Team 2) mobilizing. Twelve miles northwest of Las Vegas, NM. Grass and timber. Moderate fire behavior with creeping, single tree torching and smoldering. Numerous residences threatened. Evacuations, area, road and trail closures in effect. Reduction in acreage due to more accurate mapping.

Black, Gila NF, USFS. IMT 2 (SW Team 5). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with uphill runs, flanking and spotting. Structures threatened. Evacuations, area, road and trail closures in effect.

Bear Trap, Cibola NF, USFS. IMT 2 (CA Team 10). Twenty-two miles southwest of Magdalena, NM. Timber. Active fire behavior with running and flanking. Structures threatened. Area, road and trail closures in effect.

Cerro Pelado, Santa Fe NF, USFS. IMT 2 (RM Team 3). Seven miles east of Jemez Springs, NM. Grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

* **Elgin Bridge**, Southeast District, Arizona DOF. One mile northeast of Elgin, AZ. Brush, grass and chaparral. Active fire behavior with creeping, smoldering and backing. Structures threatened.

Biggs, Capitan District, New Mexico State Forestry. Seven miles east of Corona, NM. Brush and grass. Moderate fire behavior with creeping and isolated torching. Structures threatened.

Ten Year Average Fires (2012 – 2021 as of today)	20,305
Ten Year Average Acres (2012 – 2021 as of today)	838,935

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: Upper ridging will move into the Great Basin as upper troughing moves east into the Mississippi Valley and strong upper ridging remains along the East Coast. A cold front will move east across the Mississippi Valley into the Great Lakes, Ohio and Tennessee Valleys, and northern Gulf Coast. Showers and thunderstorms will develop along and east of the cold front with severe thunderstorms and heavy rain possible from eastern Texas into the Lower Mississippi and Tennessee Valleys. Low afternoon relative humidity of 5-15% will continue across much of southern Nevada into Arizona and central and southern New Mexico. Elevated fire weather conditions are likely across portions of eastern Arizona into western New Mexico and the Trans Pecos amid west to northwest winds. Hot temperatures will continue in the Central Valley of California as well.

ESCAPE ROUTES – Part 3

Operational Engagement Category

A primary objective of every operational fire plan is to keep firefighters out of entrapment situations. However, firefighters must always be prepared to escape quickly to a safety zone or deployment area. Consider the following while discussing escape from possible entrapment.

- Have a plan that includes trigger points.
 - **Trigger Point:** An observable event that triggers a pre-determined action. Example: If the temperature reaches 98 °F and relative humidity (RH) goes into single digits, the crew will follow the established escape route to the safety zone.
- Reassess escape routes throughout the operational period.
 - Does access to escape routes become more difficult as the day progresses?
 - Do you have more than one escape route?
 - Are all escape routes clearly marked?
 - Are all firefighters familiar with the escape routes?
- During an escape, time will be short. Describe considerations in this situation such as:
 - Maintain all critical equipment such as personal protective equipment (PPE) and radio. Discard gear that will not aid in your escape.
 - Maintain contact with all other crewmembers.
- Describe a good safety zone. How is that different from a deployment area?
- You should always know the location of your escape routes leading to safety zones and deployment areas.
