

**National Interagency Coordination Center  
Incident Management Situation Report  
Wednesday, June 1, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (113 fires)
New large incidents:	1
Large fires contained:	0
Uncontained large fires: **	11
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3
***Complex IMTs committed:	0

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are two fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 5):**

New fires:	12
New large incidents:	0
Uncontained large fires:	6
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	3

**Hermits Peak**, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (PNW Team 2) and IMT 1 (SW Team 2). Twelve miles northwest of Las Vegas, NM. Grass and timber. Active fire behavior with uphill runs, flanking and backing. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

**Black**, Gila NF, USFS. IMT 2 (SW Team 3). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with uphill runs, flanking and group torching. Structures threatened. Evacuations, area, road and trail closures in effect.

**Lost Lake**, Colorado River Agency, BIA. Fifteen miles southwest of Parker, AZ. Minimal fire behavior with creeping, isolated torching and smoldering. Residences threatened. Area closures in effect.

**Bear Trap**, Cibola NF, USFS. Transfer of command from IMT 2 (CA Team 10) back to the local unit will occur today. Twenty-two miles southwest of Magdalena, NM. Timber. Minimal fire behavior with creeping, backing and smoldering. Structures threatened. Area, road and trail closures in effect.

**Foster**, Coronado NF, USFS. Thirty miles southwest of Animas, NM. Grass, brush and timber. Moderate fire behavior with wind-driven runs, flanking and backing. Reduction in acreage due to more accurate mapping.

**Cerro Pelado**, Santa Fe NF, USFS. Transfer of command from IMT 2 (RM Team 3) back to the local unit will occur today. Seven miles east of Jemez Springs, NM. Grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** Dry and breezy conditions are expected across portions of Arizona into the Four Corners region, but a backdoor cold front will push west towards the Divide across Colorado and New Mexico. East winds will develop with the frontal passage, with higher relative humidity and cooler temperatures expected across much of eastern Colorado and eastern New Mexico. If fires are very active today, pyrocumulonimbus development is possible across southern Colorado into New Mexico. To the west, dry conditions with low afternoon relative humidity will occur across much of the central and southern Great Basin into California. Isolated afternoon thunderstorms will develop in the Cascades and northern Rockies, but fuels are not receptive currently. Strong to severe thunderstorms are expected to develop from southwest Texas to the Northeast along and ahead of a cold front.

# LEAD Time

## My Safety

Leadership Category

An important aspect of safety is individual responsibility for one's own health and safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning safety. It is important that individual responsibility is taught as the basis for a viable safety program. Some of those individual responsibilities are:

- Fitness for duty. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are foundations for your personal safety.
- Utilization of personal protective equipment (PPE). Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. Utilize PPE when a hazard is identified that can be mitigated by wearing a particular PPE component.
- Following safe work practices. For example, using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure how to perform a job or task safely, ask your supervisor or an experienced coworker.
- Using the correct reference materials is an important aspect of safety. You should have a working knowledge of the [Interagency Standards for Fire and Aviation Operations \(Red Book\)](#), [Incident Response Pocket Guide \(IRPG\)](#), [PMS 461](#), and your local operating guidelines.
- Ensure instructions are clearly understood. Communication is a basic responsibility for all fire personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you observe hazards that may place you or others at risk.
- Maintain situational awareness at all times. Awareness is a vital component of *My Safety*. Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or sharing information.

**Summary:** Do not expect someone else to be responsible for your safety. Take it upon yourself to make *My Safety* your number one priority.

### Discussions Points:

- Talk about ways you can improve your safety.
- Have your supervisor talk about their expectations for individual safety.
