

**National Interagency Coordination Center  
Incident Management Situation Report  
Monday, June 6, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (43 fires)
New large incidents:	1
Large fires contained:	2
Uncontained large fires: **	6
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1
***Complex IMTs committed:	0

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are two fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

**Southwest Area (PL 4)**

New fires:	9
New large incidents:	0
Uncontained large fires:	5
NIMOs committed:	1
Type 1 IMTs committed:	3
Type 2 IMTs committed:	1

**Hermits Peak**, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (PNW Team 2) and IMT 1 (SW Team 2). IMT 1 (SW Team 1) mobilizing. Twelve miles northwest of Las Vegas, NM. Grass and timber. Moderate fire behavior with backing, flanking and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect.

**Black**, Gila NF, USFS. IMT 2 (SW Team 3). Twenty-four miles north of Mimbres, NM. Timber and chaparral. Active fire behavior with wind-driven runs, uphill runs and flanking. Structures threatened. Evacuations, area, road and trail closures in effect.

**Foster**, Coronado NF, USFS. Thirty miles southwest of Animas, NM. Grass, brush and timber. Minimal fire behavior.

**Cerro Pelado**, Santa Fe NF, USFS. Seven miles east of Jemez Springs, NM. Grass, brush and timber. Minimal fire behavior with smoldering. Area, road and trail closures in effect.

**Bear Trap**, Cibola NF, USFS. Twenty-two miles southwest of Magdalena, NM. Timber. No new information.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** Breezy and dry conditions will develop across the Southwest this afternoon with west winds 10-20 mph amid relative humidity of 10-20%. Windy and dry conditions will also develop across southern Wyoming, but fuels remain too moist for a significant fire weather threat. Very warm conditions will continue across the western Interior and southwest Alaska with high temperatures in the 70s to mid-80s. Isolated to scattered mainly wet thunderstorms will develop across south-central and southwest Alaska as well. Low afternoon relative humidity of 15-30% is forecast across east of the Appalachians from the Carolinas to New England, but recent rainfall will continue to mitigate the fire weather threat. Showers with scattered thunderstorms will develop across the northern and central Rockies into the Plains and Mississippi Valley, with severe storms likely across the central Plains into the Black Hills.

## Aviation Watch Outs

*Aviation Category*

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions about every mission.

- Is the flight necessary?
- Who is in charge?
- Are hazards identified and known?
  - Have flight hazards been assessed? Have the pilots been informed?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
  - Radio communications.
  - Environmental conditions – weather, visibility, terrain, elevation, temperatures.
  - Mission priorities.
  - Successful mission completion probabilities.
- Is there a better way to complete the mission?
- Is there pressure to complete a mission at all costs?
- Can you justify your actions?
- Is the mission airspace confined or congested?
  - Multiple aircraft.
  - Mixed types of aircraft.
  - Poor visibility.
- Do you have an escape route?
- Are any guidelines or policies being ignored?
- Is communication between any individuals strained or tense?
- Are you deviating from the assigned operation or flight?
