

**National Interagency Coordination Center  
Incident Management Situation Report  
Friday, June 10, 2022 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

Initial attack activity:	Light (113 fires)
New large incidents:	9
Large fires contained:	1
Uncontained large fires: **	6
Area Command teams committed:	0
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	2
***Complex IMTs committed:	0

\*\*\*Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 18 fires being managed under a strategy other than full suppression.

\*\*Uncontained large fires include only fires being managed under a full suppression strategy.

### **Southwest Area (PL 4)**

New fires:	24
New large incidents:	1
Uncontained large fires:	4
NIMOs committed:	1
Type 1 IMTs committed:	2
Type 2 IMTs committed:	1

**Black**, Gila NF, USFS. IMT 2 (SW Team 3). Twenty-four miles north of Mimbres, NM. Timber and grass. Active fire behavior with wind-driven runs, uphill runs and backing. Structures threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

**Hermits Peak**, Santa Fe NF, USFS. NIMO (Team 2), IMT 1 (SW Team 2) and IMT 1 (SW Team 1). Twelve miles northwest of Las Vegas, NM. Hardwood litter, timber and light slash. Moderate fire behavior with flanking, backing and spotting. Numerous residences threatened. Evacuations, area, road and trail closures in effect. Precipitation occurred over the fire area yesterday.

\* **Deer Creek**, Coronado NF, USFS. Twenty-five miles southwest of Animas, NM. Grass and brush. Active fire behavior with flanking, backing and running. Road and area closures in effect.

**Cerro Pelado**, Santa Fe NF, USFS. Seven miles east of Jemez Springs, NM. Grass, closed timber litter and medium slash. Minimal fire behavior. Area, road and trail closures in effect.

### **Alaska Area (PL 3)**

New fires:	14
New large incidents:	7
Uncontained large fires:	0
Type 2 IMTs committed:	1

**East Fork**, Galena Zone, BLM. IMT 2 (AK Green Team) mobilizing. Started on FWS land 25 miles northeast of St. Mary's, AK. Timber, brush and grass. Extreme fire behavior with wind-driven runs and isolated torching. Several communities threatened.

**Hog Butte**, Tanana Zone, BLM. Previously reported incident. Twenty-one miles northwest of Telida, AK. Timber and grass. Active fire behavior with backing. Last narrative report unless new information is received.

\* **Iowithla River**, Southwest Area, Alaska DOF. Seventeen miles northeast of Dillingham, AK. Timber and brush. Active fire behavior with smoldering, creeping and backing. Last narrative report unless new information is received.

\* **Pike Creek**, Southwest Area, Alaska DOF. Fifty miles northwest of Newhalen, AK. Timber and brush. Active fire behavior with crowning. Last narrative report unless new information is received.

\* **Door Mountain**, Southwest Area, DOF. Twenty-five miles southwest of Lime Village, AK. Timber and brush. Active fire behavior with creeping and backing. Last narrative report unless new information is received.

\* **Koktuli River**, Southwest Area, Alaska DOF. Forty-nine miles northwest of Newhalen, AK. Hardwood litter. Active fire behavior with torching and long-range spotting. Last narrative report unless new information is received.

\* **Kiknik**, Southwest Area, Alaska DOF. Sixty-six miles southwest of Lime Village, AK. Timber and brush. Active fire behavior with creeping, backing and running. Last narrative report unless new information is received.

\* **Titnuk Creek**, Southwest Area, Alaska DOF. Sixty-four miles southwest of Lime Village, AK. Timber and brush. Active fire behavior with creeping, backing and single tree torching. Last narrative report unless new information is received.

\* **Dummy Creek**, Southwest Area, Alaska DOF. Thirty-five miles northwest of Port Alsworth, AK. Timber and brush. Moderate fire behavior with smoldering, creeping and backing. Last narrative report unless new information is received.

\*1 Hectare = 2.47 Acres

**Predictive Services Discussion:** Isolated to scattered mixed wet and dry thunderstorms are likely from eastern into central Arizona and southern into central New Mexico, especially over the higher terrain. Isolated dry thunderstorms may spread into northern Arizona and southern Colorado as well. Given the very hot temperatures and dry fuels within the forecast area of thunderstorms, new ignitions are expected, and there is forecast High-Risk significant fire potential. Hot and dry conditions will spread across inland southern and central California, much of the Great Basin, and West Slope, with temperatures ranging from 90-115°F and relative humidity of 5-15%. Warm, dry, and breezy conditions will continue across portions of southwest Alaska and the Interior.

Showers will continue across western Washington and northwest Oregon into the Idaho Panhandle and northwest Montana. Severe thunderstorms are likely from the ArkLaTex through the Lower Mississippi Valley to the western Florida Panhandle. Pockets of lower relative humidity are likely in the Southeast and New England amid the post-frontal environment.

# Hazard Mitigation Through Risk Management

Operational Engagement Category

Risk management doesn't get in the way of doing the mission – it is the way we do the mission. The risk management process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision-making. Good risk management utilizes a five-step process:

## ● Step 1 – Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (apply local area information from the Fire Danger PocketCard).
- Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- Attempt to determine why any discrepancies exist before proceeding.

## ● Step 2 – Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around and the Tactical Watch Outs (both located in the [Incident Response Pocket Guide \[IRPG\], PMS 461](#)) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational degradation based on probability and severity (probability: how likely an event will occur; severity: consequences if the event occurs). Keep in mind that increased exposure time increases probability.

## ● Step 3 – Hazard Control:

- Determine the best approach to mitigate or control the risk based on the hazards assessed.
- Establish controls (e.g., anchor point, Lookouts, Communications, Escape Routes, and Safety Zones [LCES], utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.

## ● Step 4 – Decision Point (decision to accept or not accept the risks associated with an action):

- Ask yourself: (1) are controls in place for identified hazards, (2) are tactics selected based on expected fire behavior, and (3) are instructions given and understood?
- Make certain the decision is made at the appropriate level. If not, elevate to a higher level.
- Reject the action if the risk is unacceptable.

## ● Step 5 – Evaluation:

- Ensure controls are implemented and accomplished to standards.
- Supervise/evaluate the effectiveness of controls and decisions. Monitor the situation and adjust risk controls as necessary.
- Anticipate consequences of decisions; if controls do not work, determine the problem, and derive a better solution.
- Adjust actions as the situation changes. Maintain situational awareness.
- Solicit and provide feedback throughout the process.
