**Predictive Services Discussion:** Dry and breezy conditions, west-southwest sustained winds of 15-20 mph gusting 25-35 mph amid minimum relative humidity of 5-20%, will continue across much of the Southwest, Colorado, and into southeast Wyoming and northwest Nebraska. South-southwest winds of 15-20 mph gusting 25-35 mph amid minimum relative humidity of 15-30% are expected across much of Texas as well. Very dry conditions will remain across the southern and western Great Basin and southern and central California, including gusty northerly winds in California. Isolated to scattered thunderstorms are likely from south-central Alaska through the Interior, with warmer temperatures in central and eastern portions of the Interior. Showers are likely along the southern coast as well. Minimum relative humidity will be 15-35% from southwest Alaska through the Interior.

Lingering showers will continue in the northern Rockies, including high elevation snow in northwest Montana. Strong to severe thunderstorms are likely across portions of the northern Plains into the Upper Midwest and along the East Coast from DelMarVa through Georgia. Thunderstorms may form along the dryline from southwest Kansas through west Texas. Hot and humid conditions will continue across the Mississippi and Ohio Valleys and into the Great Lakes.

## Helicopter Landing Area Safety

*Aviation Category*

The following points should be considered when operating around an unimproved landing site:

- Always wear your personal protective equipment (PPE) when working near an operating helicopter (eye, hearing, head, etc.).
- Always get the approval of a flight crew member or the pilot before approaching an operating helicopter.
- Only approach and depart a helicopter as directed. Use a slightly crouched position. Do not run. Always keep in the pilot's field of vision.
- Never go near the tail of helicopters.
- When loading helicopters in uneven terrain, always approach and depart from the down slope (lower) side and do not hold equipment overhead.
- Remove or secure loose articles prior to working around an operating helicopter.
- Do not reach up for or chase after loose objects.
- Blowing dust, sand, or rocks caused by the helicopter's rotor wash can be hazardous. Institute dust abatement actions at the landing area if necessary.
