**Predictive Services Discussion:** Upper-level ridging will be over much of the southern tier of CONUS, with upper highs forecast over New Mexico and the southern and central Appalachians. Hot and dry conditions are expected across the Southwest and into the southern Great Basin and southern and central California. Dry and breezy conditions will likely continue across portions of the southern and central High Plains and Colorado Rockies. Isolated to scattered thunderstorms are expected from the Alaska Range through the central and eastern portions of the Interior. Above normal temperatures and relative humidity of 15-30% are expected in the Interior as well. Strong to severe thunderstorms are forecast along and ahead of a cold front from Kansas through the western Great Lakes and Upper Midwest. Isolated to scattered thunderstorms are also likely across much of the Southeast and Appalachians.

## Helicopter Landing Zone Selection

*Aviation Category*

Consider the following points when selecting a landing zone for a helicopter:

- Locate a flat area that is of sufficient size for the type of helicopter you are expecting.
  - Type 1 – Clear and level touchdown pad measuring 30 feet by 30 feet; safety circle measuring 110 feet in diameter.
  - Type 2 – Clear and level touchdown pad measuring 20 feet by 20 feet; safety circle measuring 90 feet in diameter.
  - Type 3 – Clear and level touchdown pad measuring 15 feet by 15 feet; safety circle measuring 75 feet in diameter.
- Choose an area clear of people, vehicles, and obstructions such as trees, poles, and, especially, overhead wires.
- The area must be free of stumps, brush, posts, large rocks, or anything over 18 inches high.
- Consider the wind direction. Helicopters land and take off into the wind.
- Choose an approach free of obstructions. Any obstruction you cannot eliminate should be relayed to the helicopter crew during initial radio contact.
- Remove or secure any loose items in and around the landing area such as trash, blankets, hats, or equipment.
- Wet down the landing area if dusty conditions are present.
